I.Message to Shareholders

In 2017, economic stimulants combined with expansionary fiscal and monetary policies from countries including USA, Japan and the EU triggered a recovery of investment, trading and industrial production activities around the world. This recovery coincided with an upturn in international commodity prices, causing significant growth in global trade while spreading the growth momentum to emerging economies as well. Driven by the worldwide economic recovery, Taiwan saw its export volume grow and the stock market rise, which in turn boosted private consumption. Meanwhile, the government's continuous efforts to improve the investment environment had yielded positive results and contributed to the growth of the domestic economy. According to statistics published by the Directorate General of Budget, Accounting and Statistics, Taiwan's 2017 full-year economic growth rate was concluded at 2.86%, which was higher than the 1.41% a year ago.

The Bank has long been committed to achieving consistent growth, and exploring innovations via financial technologies based on risk control. Meanwhile, digital trends and ongoing social development have also prompted the Bank to utilize resources and synergies from the financial group to provide comprehensive and suitable range of financial products and services for customers. Owing to the efforts of our employees, the Bank managed to achieve growth in all business categories, and generated consolidated net income totaling NT\$16.931 billion for the year 2017, representing an 11% growth.

With respect to wholesale banking, the Bank aims not only to secure its existing business foundation and customer relations, but is also actively exploring new services, overseas markets, and further business collaboration with peers. We aim to raise customers' loyalty by introducing differentiated services while adopting a customer-centric strategy and proper risk controls. It is our goal to rediscover the value of banks as financial intermediaries and win the preferences of our customers. As for retail banking, we adopt a customer-centric business philosophy to offer customized product lines and financial services that are closely associated with customers' lifestyles. From insurance, investment, digital deposit account, mortgage, personal loan, student loan, credit card to digital platforms, we satisfy customers' needs to access these services anytime, anywhere and on the go. The Bank has responded actively to the ongoing digital transformation of the financial environment by introducing innovative business models and payment services that incorporate the latest technologies. We continue to build and optimize our electronic trading platforms and integrate virtual and physical channels, and became one of the first financial institutions to be approved by the Financial Supervisory Commission for blockchain services.

In terms of overseas markets, the Bank made a significant breakthrough in 2014 after acquiring Fubon Bank (China) Co., Ltd as its subsidiary, which enabled it to reach Taiwanese businesses gathered around Yangtze River Delta, the Pearl River Delta, Beijing, Tianjin, Hebei, Chengdu and Chongqing and satisfy their needs for financial service. This acquisition made Fubon the Taiwanese bank with the broadest network coverage and the only one to possess full banking

license in China. The Bank now has the leading advantage over peers to deliver cross-border financial service, and make greater contributions to cross-strait financial collaboration and development in the future. The Bank opened its Singapore Branch in March 2016 and later acquired approval from the Financial Supervisory Commission in 2017 to establish a representative office in Indonesia. These new developments signified a leap from the Greater China Markets toward ASEAN countries, and brought us closer to our goal of financial integration in Asia. With this new presence, we hope to participate in the growth of ASEAN countries by providing Taiwanese businesses with more comprehensive and better quality financial services across borders, and take steps toward becoming "The Best Financial Institution in Asia."

The Bank had made some significant adjustments to its organization in 2017 in response to changes in the environment and new business requirements. The details are as follows:

- For better support of wealth management services, a "Wealth Management Risk Management Committee" has been assembled to alert market risk, credit risk and price risk of all products offered through wealth management, and to monitor abnormal sales behaviors such as excessive concentration, inappropriate solicitation, and short-term trading of wealth management products.
- 2. For performance enhancement to the SME segment and for better support of the Bank's branch localization strategy, functionality and responsibilities of the "Emerging Banking Division" have been consolidated under the Retail Banking Division.
- 3. For more effective promotion, expansion and development of new payment services, a new "Payment Service Department" has been created under the Retail Banking Division.

Corporate sustainability and social responsibility are two issues that the Bank has devoted significant attention to. The Bank supports Fubon Financial Holding's Co., Ltd "ESG Vision" and fulfills its role by implementing action plans in five different strategies, namely: pilot investment, innovation, localization, responsible lending and positive care. The Bank has aligned its practices with the rest of the world by signing the Equator Principles, and hopes to exert financial influence to direct the attention of its borrowers toward the environmental and social impacts of their business activities. The Bank also encourages innovation and supports the green energy industry, and is constantly exploring commercial models that are friendly to the environment and the society, and bringing sustainable concepts into economic practices. While we maximize returns for the shareholders, we also try to give back what was earned from the society. Through Taipei Fubon Bank Charity Foundation, we continue to devote efforts into elderly care, care for persons with disability, and charity. By extending care to the socially disadvantaged, we aim to fulfill our goal of giving back to the society. The Bank makes annual donations to Fubon Charitable Foundation, Fubon Cultural & Educational Foundation and Fubon Art Foundation to finance their charity activities, and thereby contributes to creating a better society.

Below are descriptions of the Bank's 2017 business results and 2018 business plans:

1. 2017 business results

The Bank generated consolidated net income totaling NT\$16.931 billion in 2017, which was equivalent to an EPS of NT\$1.58. Consolidated total assets amounted to NT\$2,671.7 billion at the end of the year, while net loan balance stood at NT\$1,383.8 billion and net deposit balance at NT\$2,067.9 billion.

The Bank continued to maintain diligent risk management practices while growing profits, and managed to keep overdue loan ratio and loan coverage ratio strong at 0.17% and 764.46%, respectively, at the end of 2017. Sound asset quality is what supports the Bank's profitability and future potentials, and because of the strong business performance and asset quality it had exhibited throughout the year, the Bank sustained a long-term credit rating of "twAA+," a short-term credit rating of "twA-1+," and a "Stable" outlook from Taiwan Ratings Corp. in the report dated November 13, 2017, which was an affirmation to the Bank's outstanding profitability and asset quality.

The Bank's professionalism and excellent business performance had been well-recognized by the financial world in 2017, winning multiple awards from renowned institutions local and abroad. In terms of investment banking, cash management and bond underwriting, the Bank won awards from Global Finance, Asiamoney and FinanceAsia; in terms of digital banking, private banking and wealth management, the Bank was awarded by Euromoney, The Asian Banker, The Asset, Business Today and Global View.

2. 2018 business plans

Global trade prospects should remain favorable in 2018, if the manufacturing sector continues to grow while international commodity prices stabilize. However, the external environment still presents many uncertainties including: changes of monetary policies in advanced economies, rising interest rate, exchange rate movements and volatility, rising geopolitical risk in certain locations, and slowdown of economic growth in China. Although next year's statistics will be comparing to a relatively "good" year, research institutions around the world generally expect moderate growth in the global economy. Taiwan has been characterized as an export-driven open economy of relatively small scale, which makes it all the more susceptible to changes in the global economy. Taiwan's export trade should continue to grow under the government's infrastructure developments, the 5+2 industries project and new tax reform, which in turn is expected to stimulate private spending and investment and contribute additional growth momentum. However, with the heightened basis of comparison and global trade growth expected to taper off in the following year, the Directorate General of Budget, Accounting and Statistics published its 2018 Taiwan growth estimate at 2.42% on February 13, 2018, which is slightly lower than the 2017 actual growth rate of 2.86%.

In 2018, the Bank will be targeting "growth, re-organization, and market share" as its main business focus. Through integration of physical and virtual channels and innovations involving digital banking and mobile services, the Bank aims to create the ultimate consumer experience of

"banking in all aspects of life" with use of financial technologies, and will continue building a more proactive service culture based on its customer-centric business philosophy, and strive to become customers' most trusted bank.

With the collaboration between institutional banking and retail banking teams, we hope to improve both business performance and customer service, and bring more competitive and suitable financial products and services to customers. The following is a description of the Bank's key operating strategies:

(1) Institutional banking:

A. Strengthen local foothold and expand regional presence

Penetrate target customers and assist in the growth of domestic SMEs. Expand business reach to overseas markets not only through Fubon Bank (China) Co., Ltd, but also using Vietnam and Singapore Branches as the Southeast Asian business hub. Aim to create synergy and explore international financing service opportunities through regional connection.

B. Raise service value and upgrade customer relations

Aim to develop integrated financial services; assemble a consultative sales team that provides customers with comprehensive financial services from funding, financial consultation to hedging. Penetrate potential customers by building partner relationship and participating in their growth.

C. Enhanced compliance and risk control

In addition to incorporating environmental, social and governance (ESG) factors into credit assessment, the Bank will also be monitoring industry-specific risks closely and introducing refined credit assessment and post-lending practices to gain more precise control of business risks and thereby maintain asset quality.

D. Green, sustainability and corporate social responsibilities

Exercise financial influence by implementing responsible investment/lending guidelines and developing environment-friendly and innovative products; adapt sustainability values into internal operations and exert positive leadership on the society.

E. Development of human capital and soft power in sustainability

Recruit, train and promote top talents; rotate local and overseas employees for closer teamwork.

(2) Retail banking:

A. Enforcement of branch versatility and localization strategies

Enforce the branch versatility and localization strategy by promoting and cross-selling products from wealth management, consumer banking, and new business segments, and thereby create value through localized branch service. Optimize branch network and provide customers with a better service environment by adopting the digital trend. The Bank will be renovating a new generation of digital branches throughout Taiwan, with upgraded hardware and software and simplified procedures that not only improve the Bank's brand image, but deliver excellent quality and convenience to customers as well.

B. Big data and precision marketing

By applying big data analysis and more refined customer segmentation, we aim to explore customers' needs in greater precision and address them with suitable financial products and total, customized investment planning that are precisely tailored for each individual.

C. Digital platform and digital service

The Bank will more actively incorporate mobile payment service into a greater number of living scenarios, and create innovative banking platforms with more connected features and better optimized service procedures. Furthermore, the Bank will be escalating its involvements in social media and digital marketing while adopting innovative ways to integrate customers, products and distribution. By increasing market share in e-payment and winning customers' preference, we aim to become "customers' preferred partner in wealth creation."

D. Enhanced risk management

The Bank will continue optimizing its credit assessment practices while at the same time create a risk decision management system and a property price inquiry system for enhanced risk management. Combined with practices such as robust trade control, training, and checking of high-risk list, the Bank shall improve its asset quality and operating efficiency.

E. One extra mile of heartfelt services

The Bank will adhere to its customer-centric philosophy and train employees accordingly to further improve service quality and satisfy customers' needs in ways that conform with the Bank's distinctive mission of "offering one extra mile of heartfelt services."

3. Credit Rating

Rating Date	Credit Rating Institution	Long-term Credit Ratings	Short-term Credit Ratings	Outlook

2017/11/13	Standard & Poor's	A-	A-2	Stable
2017/11/13	Taiwan Ratings Corporation	twAA+	twA-1+	Stable

II. Corporate Profile

1. Introduction

(1) Date of establishment

The Bank was incorporated with the approval of the Ministry of Finance (registration no:7864) The Bank began business operations on April 21, 1969.

(2) Bank history

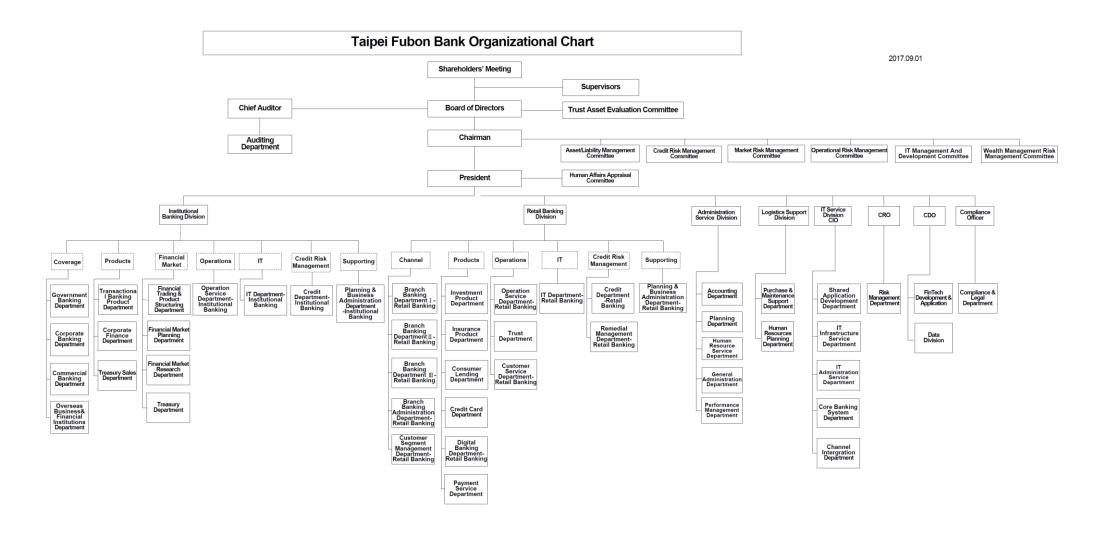

- A. The Bank was founded on April 21, 1969 as part of the nation's financial policy to finance local business activities, municipal constructions, and to serve as a municipal treasury. It was initially funded by Taipei City Government to perform services within the boundary of Taipei City, and operated under the name "Taipei Municipal Bank." The Bank was first established as a municipal financial institution, and was later reorganized into a company limited by shares.
- B. On January 1, 1993, the Bank was renamed Taipei Bank Co., Ltd. (Taipei Bank) for better distinction as a corporate entity. Under the government's financial liberalization movement, the Bank established Kaohsiung Branch, the first branch outside Taipei, in 1994. On January 20, 1995, the Bank received the permission to transform from a regional bank to a national bank, which enabled it to provide services to the entire nation. In 1997, the Bank completed a public offering of NT\$2 billion to employees and the general public, and was listed for trading on July 23 the same year. On November 30, 1999, the Bank was officially privatized under the government's prevailing policy to privatize state-owned enterprises. To facilitate long-term business development, the Bank became a 100%-owned subsidiary of Fubon Financial Holding on December 23, 2002 and terminated its listing on the TWSE the same day.
- C. After acquiring Taipei Bank on December 23, 2002, Fubon Financial Holding Co., Ltd decided to have Taipei Bank and Fubon Bank operate temporarily as two independent entities, but took aggressive steps to consolidate information systems, operating procedures and personnel between the two banks during this time, so that the two entities may retain their advantages and brand value while minimize the impact of potential merger in the future.
- D. After two years of coordination, Taipei Bank and Fubon Bank were merged on January 1, 2005 into a single entity named "Taipei Fubon Bank." This marked the first merger in Taiwan involving a state-owned bank and a private bank, and the success of it not only brought profits for Fubon Financial Holding, but signified a monumental milestone in the development of Taiwan's banking history as well.
- E. Fubon Bills Finance Corporation used to be a 100%-owned subsidiary of the Bank,

but in order to maximize synergies within the financial group, Fubon Bill was merged into the Bank on December 25, 2006, which successfully resolved the overlap of bills financial service between the two entities. In June 2008, the Bank established Ho Chi Minh City Branch in Vietnam.

- F. The Bank acquired Hanoi Branch and Ho Chi Minh City Sub-branch from Chinfon Bank on March 6, 2010, and later completed name change and license replacement on June 7 the same year. Since then, these two branches have been operating under the Bank's name. The Bank currently has three business locations in Vietnam, namely: Hanoi Branch, Ho Chi Minh City Branch, and Binh Duong Branch.
- G. Fubon Insurance Agents Co., Ltd. used to be a 100%-owned subsidiary of the Bank; during the board meeting dated September 21, 2010, the directors acknowledged August 31 as the date of liquidation and appointed Taipei Fubon Bank as the custodian for the subsidiary's books and records.
- H. The Bank acquired a 10% equity interest in Fubon Bank (China) Co., Ltd on December 31, 2013 and later increased its equity interest to 51% on January 7, 2014, gaining control and making Fubon Bank (China) Co., Ltd a subsidiary of the Bank.
- I. On May 21, 2015, the Bank received permission from Monetary Authority of Singapore to establish Singapore Branch. The branch later opened for business on March 14, 2016.
- J. Taipei Fubon Bank Life Insurance Agent Co., Ltd. used to be a 100%-owned subsidiary of the Bank; it was merged into the Bank on April 29, 2016 for synergistic benefits and resource integration.
- K. On January 6, 2016, the Bank received permission from the Financial Supervisory Commission to close down its LA Branch; the actual closure of LA Branch took place on June 30, 2016.
- L. The Bank did not undergo any change of management, operation or business activity in 2017, and there were no significant occurrences likely to affect shareholders' equity.

III. Business Operations

1. Business Information

(1) Breakdown of Total Revenues

Business Category	Weight	
	2017	2016
Institutional Banking	43%	43%
Retail Banking	44%	43%
Overseas Subsidiary	10%	14%

(2) Business Performance

Institutional Banking Business

- A. In light of intensifying price competition in corporate lending, the Bank has been focusing on exploring customers' needs in greater diversity and satisfying them through integrated financial services as well as available platforms local and abroad. Meanwhile, the Bank has exercised diligent risk control to ensure the stability of its revenues.
- B. Our successful anticipation of market volatility had enabled us to generate higher revenues from treasury activities as compared to the previous year.
- C. Our attention to the growth of Southeast Asian markets is starting to realize the potentials of our overseas branches; as a result, contributions from overseas business have significantly increased.

Retail Banking Business

- A. The Bank has been offering investors a broad variety of products to meet investors' diverse financial needs, risk preference, and risk tolerance, and presenting them with wealth accumulation, protection and transfer solutions that conform with the latest market trends. Our recent integration of virtual and physical channels combined with enhanced security has greatly improved the convenience of online transactions. Sales in the wealth management segment had increased compared to the previous year as a result.
- B. In light of the intensive competition in consumer lending, the Bank has continued working with top-performing real estate agents and developers made enhancements to online personal loan service in terms of application process and product feature, which resulted in the growth of consumer banking businesses over the previous year.
- C. Consumer spending had risen following the worldwide economic recovery, and the Bank had capitalized on this growth by offering privileges on a variety of purchases from online shopping, tourism, insurance to overseas spending. Meanwhile, additional resources were invested into mobile payment solutions to provide customers with faster and more convenient shopping experience. Overall, the amount of credit card spending had increased compared to the previous year, and the Bank ranked first among the six major card issuers in terms of monthly spending per active card.

Overseas subsidiary Business

- A. After lead-arranging several syndicated loans, the Bank's Chinese subsidiary has successfully opened up the syndicated loan market in China with the help of local and foreign peers. Fubon Bank (China) Co., Ltd currently ranks first among foreign banks and joint venture banks in China for the amount of syndicated loans completed as a lead arranger. The subsidiary is also the only Taiwanese lead arranger to be designated by China Banking Association for syndicated loan collaborations with China Development Bank on the "New Silk Road" program.
- B. Taking advantage of the current Fintech environment in China, the Chinese subsidiary has been actively exploring innovations such as "automated loan approval," "Robo-advisor" and "virtual branch." It has successfully engaged a well-established local Internet banking platform in a strategic collaboration, which shall provide the foundation for our next step into the era of smart technologies.
- C. Motivated by Fubon Group's spirit of "unity and positivity," the subsidiary has donated for the creation of a non-profit foundation that specializes in charity activities. Meanwhile, all employees of the subsidiary are being mobilized to support the "Smile Train" program that aims to comfort children and women living in poor areas of China. By doing so, the subsidiary has envisioned itself as becoming a beacon of positivity in China's banking industry.

2. Business Strategies and Business Plans

(1) Short-term development plan

- A. Expand SME customer base and identify potential industry sub-segments that can be exploited systematically under controlled risk.
- B. Enforce "Know Your Customer" procedures and learn customer's risk tolerance; aim to satisfy customers' needs at different stages in life and apply risk management to keep customers' exposures on the low side.
- C. Enforce the branch versatility and localization strategy that maximizes the value of each branch. Search for suitable locations to expand branch presence outside Taipei City, and undergo renovations to provide customers with better service environment.
- D. Launch customized services and refer products that suit customers' needs. Apply big data analysis to more precisely understand customers' needs and achieve personalized precision marketing.
- E. Continue development of new payment services. Construct, optimize and promote the use of various service platforms, while at the same time exploit social media and digital marketing.
- F. The Bank will continually expand its bill payment service to cover broader payment categories, and offer auto-debit among other value-adding services for revenue. In terms of wealth management, the Bank will be providing total asset planning and advising customers on stop-loss, stop-gain and portfolio adjustments to enhance consultation quality and investment performance.
- G. For the credit card business, the Bank will segment its customers based on spending data captured by Join Credit Information Center and offer differentiated credit card privileges. In addition, a new credit assessment system will be developed to speed up loan approval for greater service competitiveness. Meanwhile, enhanced security measures will also be built in to reduce operational risks.

H. Overseas subsidiary

- a. Creating advantage through four "Sharing"
- (a) The first "Sharing": Overseas subsidiaries will be sharing its Taiwanese enterprises with the parent company and every subsidiary of the financial group. They will coordinate with each other to develop total solutions for each customer.
- (b) The second "Sharing": Overseas subsidiaries will be coordinating with peers to share "Large Corporation" customers (TT), and offering better financial solutions as a bank syndicate.
- (c) The third "Sharing": Overseas subsidiaries will be working with non-bank financial institutions to share commercial banking (CB) customers by offering syndicated loans.
- (d) The fourth "Sharing": Overseas subsidiaries will be sharing retail customers with quality P2P lending platforms and engaging them in cross-selling and exchange of online and offline customers for mutual benefit.
- b. Internal resources will be adjusted where appropriate to provide mid-office and back-office support for the synchronization of institutional banking and retail banking customer database. The configuration of "diverse frontline channels united under a giant platform" will provide us with better reach to customers of different segments, and realize the true potential of the "four sharing."

(2) Long-term business plans

- A. Establish banking relations with customers' affiliates and supply chain partners by offering integrated financial services; maintain partner relationship and provide comprehensive range of funding and hedging service that builds trust with customers.
- B. Expand customer base and strengthen relationship with SMEs; penetrate existing customers while extend overseas for offshore opportunities.
- C. Offer distinctive values and differentiated financial services with a customer-centric focus. Enforce compliance, risk management and make efficient allocation of risky assets.
- D. Refine service quality and operating efficiency; recruit top talents and accumulate the capacity to respond to the changing environment.
- E. Anticipate regulatory and market changes to develop financial products that meet customers' needs. Make use of offshore platforms and group resources to complement existing financial services. Develop supply chain relations and business relations with partners outside the group.
- F. Review HR procedures and enhance the existing talent management system (including: resource planning, recruitment, training, performance appraisal, career development etc). Increase the size and professional standards of the sales team; escalate service from one-way selling to private banking consultation.
- G. Incorporate the use of advanced technologies and undertake "Digital Platform Integration" and "Service Process Optimization" to develop an online service system that supports product marketing, customer sourcing, and customer satisfaction enhancement.
- H. Promote the Bank's heartfelt service culture through instructor training, mystery shopper,

performance scorecard adjustment, and knowledge exchange with other service providers, and thereby improve service quality.

I. Overseas subsidiary:

- a. The Bank will commit to its main purpose of supporting "Taiwanese enterprises" and "real economic activities in China," and take advantage of the current cross-strait relations to finance Taiwanese and Chinese SMEs. For the fulfillment of corporate social responsibilities, the Bank will establish its brand image as "the bridge in cross-strait relations."
- b. The Bank will aim to develop sustainable competitiveness in the Chinese market by focusing on the "three core capacities," which are: business capacity, risk management capacity, and customer experience enhancement capacity.
- c. The Bank will strive to raise productivity and inspire employees' performance by implementing the "three infrastructures," which include: an optimized customer relationship management framework, an improved organizational performance scorecard, and a return-driven appraisal system.

(3) Business Plans

Institutional Banking Business

- A. Expand the size of target customers; reach and penetrate potential customers through new products and new procedures for asset growth.
- B. Collaborate with third parties to develop new product lines; raise business performance with broader product diversity and refined services.
- C. Continue expansion of overseas business team and grow local businesses; appeal to customers by offering cross-border, integrated financial service and actively expand overseas service network for broader coverage and new opportunities.
- D. Optimize risk monitoring systems and practices; aim to manage business risks at greater precision and comply with regulatory requirements.
- E. Recruit, train and promote top talents; rotate local and overseas employees for closer teamwork.

Retail Banking Business

- A. Enhance customer segment management; apply big data analysis for more precise marketing and satisfaction of customers' needs. Increase product penetration and expand customer base by promoting customized services and products. Redirect business efforts toward elderly customers and the digital generation as a result of the ongoing demographic and generation changes.
- B. Provide multi-dimensional financial services covering assets and liabilities. Aim to gain market share and leadership position by taking initiative in the development of new products, new product advantages, and high-yielding services.
- C. Empower local branches and create value by offering localized, neighborhood services. Explore opportunities for new branch establishment and complete branch network adjustments to realign focus towards business opportunities in central and southern Taiwan.

- D. Expand the size of sales team and increase productivity. Leverage group resources for strategic alliances with partners of different industries for broader and more intensive promotion effort.
- E. Construct, optimize and promote use of digital platforms in ways that enhance service efficiency and reduce operating costs. Utilize social media and digital marketing channels for improved customer loyalty and customer acquisition.
- F. Develop new models, construct new systems, and optimize existing procedures in ways that support business development and total product risk control.
- G. Raise service quality and enforce the Bank's distinctive mission of "offering one extra mile of service" to win customers' preference.

Overseas Subsidiary Business

A. Institutional banking:

- a. Corporate banking: Expand liabilities via increase in settlement instruments, deposits from government, and bond offerings; optimize balance sheet allocation by investing in high-yielding, less capital-intensive instruments; target listed companies and top-100 enterprises as key customers; leverage resources from bank syndicates and investment banks to open up business opportunities with large companies and projects.
- b. Commercial banking: Acquire customers through supply chain financing, syndicated loan, and collaborating platforms; package credit guarantee with trade financing to meet the needs of SMEs; explore opportunities in line with the government's policies.
- c. Taiwanese businesses: Support Taiwanese customers and their business activities in China and Taiwan; utilize resources of business partners for more in-depth service to Taiwanese SME, and aim to increase market share; develop cross-border cash management system for more comprehensive control over the cash flow of Taiwanese customers.

B. Retail banking:

- a. Customer acquisition through salary account: Coordinate with the institutional banking segment to introduce salary accounts to potential customers, and hence create opportunities for investments and demand deposits.
- b. Customer acquisition through payment: Introduce intelligent online and offline transaction acquisition service, and collection service for tuition fees and rent.
- c. Customer acquisition through loan: Explore consumer and supply chain lending through online shared platform; obtain offline leads for potential high net worth customers; acquire customers for e-wallet(credit card) through co-brand arrangements.

C. Treasury activities:

- a. Treasury marketing (TMU): Secure and grow foreign currency transactions of existing customers while enhance treasury marketing at various branches; aim to explore FI/PE/VC new customers; package treasury transactions with institutional banking products for total solution and higher customer loyalty.
- b. Trading: Secure and strengthen the Bank's market position in foreign currency trading; promote bond hedging strategies and products; fully collaborate with the parent company and integrate internal investment/lending resources local and abroad for the

- creation of synergy and overall revenues; fully support the Treasury Department in product innovation.
- c. Asset management: Develop spotlight products in line with market trends; enhance professional capacity in asset management.
- d. Financial peers (FI): Collaborate with core customers (non-banks).
- e. Investment banks: Establish seamless connection with banking departments of the respective companies.

3. Research & Development Plans

(1) Research and development expenses

Unit: NT\$1,000

Year	2017	2016
Amount	277,247	264,085

(2) Research and development outcomes

- A. Retail banking branch business management system: To improvement service quality at branch level, the Bank had completed the development of next-generation branch business management system in 2017. The new system consolidates wealth management, personal loan and credit card services and supports connection with tablet PCs that sales people may take advantage of when visiting customers. It has the capacity to deliver all-round customer management.
- B. Fubon Lucky Money: This fun, crowd-oriented feature combines the Bank's mobile banking and Taiwan Mobile's "M+ Messenger" service. It allows users to send Fubon Lucky Money online on a "one-to-one," "one-to-many," and "many-to-many" basis. Users may even create common interest groups to send and receive Fubon Lucky Money among them. It is a new Fintech experience inspired by our goal to deliver "banking in everyday life" and make banking services accessible anytime, anywhere.
- C. Internet/mobile online application platform: The Bank continues to bring customers more convenient financial services. Today, customers simply need to complete three simple steps with their smartphone or computer to be able to complete Internet/mobile banking application, activate the fund transfer feature, and configure a one-time password without the need to visit a branch in person. This new platform makes banking services immediately available at customers' fingertips, wherever they are.
- D. Fubon enterprise service: The system provides exclusive digital banking services for SME customers. It frees SME customers from having to meet the 3:30 deadline when making salary payments or fund transfers, while allowing them to check deposit/loan account balance immediately online, and thereby facilitate more efficient management of capital. The presence of this new system has improved the quality of digital banking service and expanded customer reach.
- E. New ATM platform: The Bank launched a new ATM platform in 2017, offering "new interface," "new process," "new functions" and "customized service" from customers' perspective. The new platform has been designed to deliver the most convenient digital experience for customers.

- F. Online personal loan application platform: To facilitate faster loan application and service improvement, the Bank completed an online loan application platform with smartphone interface in 2017 that enables customers to sign contracts and request automated disbursement entirely online. All existing customers of the Bank are able to complete loan applications quickly using their smartphones for the best experience.
- G. Data governance: The data governance project was completed for the purpose of improving the Bank's data quality. The project involved the assembly of Data Governance Committee to oversee data governance-related tasks.
- H. Data value enhancement: The data value enhancement project was completed in response to the ongoing trend of digital banking and big data. By conducting themed studies and mining data from the Bank's database, we have contributed value to various business activities.

(3) Research and development plans for the future

A. Estimated R&D expenses for the next year

	Unit: NT\$1,000	
Expected expenditure on R & D for the coming year (2018)		
Amount	457,759	

B. Research and development plans for the future

- a. Mobile banking biometrics login: To provide customers with more convenient and faster user experience, the Bank will complete the development of new smartphone widget in 2018 to allow biometrics login. Customers will be able to view information and complete their requested transactions in seconds, which is the type of experience best suited for the mobile generation today.
- b. New generation of mobile banking: The Bank will complete the construction of a new generation mobile banking system in 2018 to deliver the mobile experience that meets the expectation of the smartphone generation. The new platform will target young people as its main users and incorporate hand gestures and user customization as the new design features.
- c. Robo-advisor: The Bank will be introducing a Robo-advisor platform to deliver fast, friendly and enjoyable experience for customers when making investment inquiries. The Robo-advisor will recommend ETF investments and funds depending on customers' choice of strategy, and may even suggest investment portfolios and offer full fiduciary discretionary investment service. It provides investors/young customers without dedicated financial advisors the access to affordable professional advice and discretionary investment service. This project is expected to be launched online in 2018 first half.
- d. Online insurance platform: An online insurance platform will be introduced to provide broader variety and more convenient insurance services to customers, so that customers without dedicated sales representatives may still complete insurance

- applications online and have access to full after-sale service.
- e. Big data application: The Bank will be collaborating with world-renowned companies to develop the techniques needed for big data analysis and application, which the Bank may use to support business development.
- f. Data visualization project: By adopting the latest technologies, the Bank aims to adopt a visually appealing and interactive form of presentation for its business information, corporate news and financial indicators.

	Senior high school	1.29%	0.67%	0.58%

IV. Special Notes

1. Dividend Policy and Implementation Status

(1) Dividend Policy

- A. After the Bank's final account closing each year, after-tax profits, if they exist, will be first used to make up deficits from the previous year, with 30% of the balance being set aside for legal reserves, and, under Financial Supervisory Commission rules, a special reserve (or special reserve reversal). While the remainder will be incorporated into the accumulated retained earnings of past years. The board of directors will then make a proposal for payout of dividends, which will be submitted to the shareholders' meeting for final ratification. Should the Bank's legally-required reserves consist of equivalent total capital or reach levels according to acceptable financial standards set by the regulator as per item 2, article 50 of the Banking Law, including appropriation of earnings for legally-required reserves according to the Company Law, the company can be exempt from restrictions regarding appropriation of earnings for legally-required reserves and cash-dividend payout.
 - B. Before legal reserves equal total capital and when the capital/risk-based assets ratio meets the requirements of the Banking Law, the ceiling for the payout of cash earnings should comply with the stipulations of the Banking Law and the requirements of the regulator.

(2) Implementation Status

In 2017, the appropriation of the 2016 earnings and dividends per share was proposed by the board of directors as follows:

	Dividends	Dividend Per Share
Cash dividends	NTD \$ 11,309,962,025	NTD \$ 1.06

2. Implementation of the Internal Controls System

Taipei Fubon Commercial Bank Co., Ltd.
Internal Control System Statement

To: Financial Supervisory Commission

On behalf of Taipei Fubon Commercial Bank Co., Ltd., we hereby certify that in the period from January 1, 2017 to December 31, 2017, the Bank duly complied with the "Implementation Rules of Internal Audit and Internal Control System of Financial Holding Companies and Banking Industries" in establishing an internal control system, implementing risk management processes, as well as designating an independent unit to conduct audits and report regularly to the Board of Directors and supervisors.

With respect to the securities business, the Bank assessed the effectiveness of the design and execution of its internal control system based on the evaluation criteria set forth in the "Regulations Governing the Establishment of Internal Control Systems by Service Enterprises in Securities and Futures Markets" issued by the Securities and Futures Bureau of the Financial Supervisory Commission. After careful evaluation, the Bank found that, except for the items enumerated in the attached schedule, the internal control and legal compliance systems of all units were effectively implemented during the year. This statement will be included as the primary content of the Bank's annual report and any prospectuses, and made available to the public. Any information in this statement found to be falsified, concealed, or otherwise illegal shall be subject to the legal liabilities prescribed by Articles 20, 32, 171, and 174 of the Securities and Exchange Act.

Taipei Fubon Commerical Bank Co., Ltd.

Internal Control System Declaration (with Insurance Agency Services) Date: March 21, 2018

With regard to the internal control system from January 1 2017 to December 31 2017, Taipei Fubon declares the following per self-assessment results:

- Taipei Fubon affirms that it is Taipei Fubon board of directors and management's responsibility to establish, implement and maintain internal control system and Taipei Fubon has established said system. The objective for such establishment is to provide reasonable assurance for attaining the aims of soundness of business operations, reliability of reporting and compliance of governing laws.
- Internal control system comes systemically with inevitable limitations; however sound the design of it may be, an effective internal control system provides assurance to the aforementioned aims to a mere reasonable extent; moreover, due to changes of the environments and conditions, the effectiveness of internal control system may change accordingly. Nevertheless, Taipei Fubon's internal control system is equipped with a self-monitoring mechanism - should any fault be identified, Taipei Fubon will take immediate corrective action.
- Taipei Fubon determines whether its design and implementation of internal control system are effective in accordance with "Regulations Governing the Implementation of Internal Control and Audit System and Business Solicitation System of Insurance Agent Companies and Insurance Broker Companies" (hereinafter as the "Implementation Regulations"), stipulated by the Financial Supervisory Commission. As per the Implementation Regulations, the determining factors for the effectiveness of internal control system shall at least include the following elements: 1. Controlled Environment, 2. Risk Assessment, 3. Controlled Operations, 4. Information and Communication, 5. Monitoring.
- Taipei Fubon has adopted aforesaid determining factors of internal control system to examine the effectiveness of the design and implementation of internal control system.
- Based on the examination results from the preceding point, Taipei Fubon deems the design and implementation of the internal control system (including the soundness of business operations, reliability of reporting and compliance of governing laws) within aforesaid period effective, providing a reasonable assurance to achieve the above aims.
- This declaration will be the main content of Taipei Fubon's annual report and public deliberation statement, open for public access. Any wrongful act pertaining to falsification or concealment involving the above public declaration will be subjected to legal liabilities under Articles 20, 32, 171, 174 of, and other regulations relating to, the Securities and Exchange Act, Republic of China (Taiwan).
- This declaration has been agreed and signed off by the board of directors of Taipei Fubon as of March 21, 2018; however, it is the fact that, among the 15 directors present at the board meeting, no dissented and the remainder consented herewith.

The above is addressed to Financial Supervisory Commission

Annual Financial Reports for 2017 and 2016

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders TAIPEI FUBON COMMERCIAL BANK Co., Ltd.

Opinion

We have audited the accompanying consolidated balance sheets of TAIPEI FUBON COMMERCIAL BANK Co., Ltd. (the "Bank") and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2017 and 2016, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years ended December 31, 2017 and 2016, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of TAIPEI FUBON COMMERCIAL BANK Co., Ltd. and its subsidiaries as of December 31, 2017 and 2016, and its consolidated financial performance and consolidated cash flows for the years ended December 31, 2017 and 2016, in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, certain other guidelines issued by the local authorities and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements of Financial Institutions by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Bank and its subsidiaries in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2017. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters for the Bank and its subsidiaries' consolidated financial statements for the year ended December 31, 2017 are stated as follows:

Allowance for Loans and Receivables

Refer to Note 4 to the consolidated financial statements for the accounting policies on the allowance for loans and receivables. Refer to Note 5a to the consolidated financial statements for the critical estimations and judgments about the allowance for loans and receivables. Refer to Notes 11, 12 and 50 to the consolidated financial statements for the details of the other related information about the allowance for loans and receivables.

To assess collectively the impairment of discounts and loans and receivables, management makes judgments on whether there are any observable data indicating impairment. Management then estimates expected future cash flows and assesses the impairment loss based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio.

The methodology and assumptions used for estimating objective evidence of impairment and the amount and timing of future cash flows, such as the expected loss rate and recovery rate, are critical judgments and estimates; therefore, the allowance for loans and receivables is identified as a key audit matter.

Our key audit procedures performed in respect of the above area include the following:

- 1. We understand and assess management's methodology, assumptions and inputs used in the impairment model to verify whether they appropriately reflect the actual outcome.
- 2. We assess the consistency of the effective interest rate, the impairment occurrence rate, recovery rate, etc. used in estimating expected future cash flows and evaluating collateral values. We perform a sampling of loans and receivable cases to verify their completeness and calculation accuracy.
- 3. We consider related guidelines issued by the authorities and examine whether the allowance for loans and receivables complied with the regulation.

Impairment of Goodwill

Refer to Notes 4 to the consolidated financial statements for the accounting policies on the impairment of goodwill. Refer to Note 5b to the consolidated financial statements for the critical estimations and judgments about the impairment of goodwill. Refer to Note 22 to the consolidated financial statements for the details of the other related information about the impairment of goodwill.

The assumptions for the recoverable amount of goodwill are based on the future cash flows expected to arise from the future operating results which are based on professional judgment; therefore, the impairment of goodwill is identified as a key audit matter.

Our key audit procedures performed in respect of the above area include the following:

- 1. For cash flow forecasting, we assess the suitability of the forecasting method and discount rate used by the management of the group and compare the discount rate with external information
- 2. We consider whether there is a significant difference between the actual operations after the relevant business combination and the expected benefits at the time of acquisition to assess the accuracy of the estimates from management in the past, and we determine whether the disclosures in the consolidated financial statements are appropriate.

Other Matter

We have also audited the financial statements of TAIPEI FUBON COMMERCIAL BANK Co., Ltd. as of and for the years ended December 31, 2017 and 2016 on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, the guidelines issued by the authorities International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank and its subsidiaries' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Bank and its subsidiaries' financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank and its subsidiaries' internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank and its subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify

our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank and its subsidiaries to cease to continue as a going concern.

- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Bank and its subsidiaries to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Bank and its subsidiaries audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2017 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Yi-Chun Wu and Kwan-Chung Lai.

Deloitte & Touche Taipei, Taiwan Republic of China

March 21, 2018

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the independent auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' report and consolidated financial statements shall prevail.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2017 AND 2016 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

TAIPEI FUBON COMMERCIAL BANK Co., Ltd. (the "Bank" or "Taipei Fubon Bank") began operations as a financial institution under the Taipei City Government ("TCG") in 1969. On July 1, 1984, it was reorganized into a limited liability corporation and was renamed City Bank of Taipei Co., Ltd. On January 1, 1993, the Bank was renamed TAIPEIBANK Co., Ltd. ("TAIPEIBANK"). On November 30, 1999, the Bank was privatized through the sale of its shares to the public, with TCG's holdings reduced to less than 50% of the Bank's outstanding capital stock. In a special meeting on October 4, 2002, the shareholders approved a share swap, which resulted in the Bank becoming a wholly owned subsidiary of the Fubon Financial Holdings Company ("FFH"). The board of directors designated December 23, 2002 as the effective date of the share swap and the delisting of the Bank's stock from the Taiwan Stock Exchange.

To fully benefit from the synergy of two diversified businesses and reduce operating costs, the boards of directors of the Bank and Fubon Bank Co., Ltd. ("Fubon Bank", also a wholly owned subsidiary of FFH) decided on January 1, 2005 to combine these two entities. On January 1, 2005, the Bank acquired the assets and liabilities of Fubon Bank through a share swap and changed its name to TAIPEI FUBON COMMERCIAL BANK Co., Ltd.

On September 20, 2006, the boards of directors of the Bank and Fubon Bills Finance Co., Ltd. ("FBFC") decided to merge the Bank and FBFC to strengthen their operating synergies and lower operating costs, with the Bank as the surviving entity. The Bank set December 25, 2006 as the effective date of the merger.

Later, under the terms and conditions of the "Sale and Assumption Agreement" signed by the Bank, Chinfon Commercial Bank Co., Ltd. ("Chinfon Bank"), the Central Deposit Insurance Corp. and the Executive Yuan's Financial Reconstruction Trust Corporation on October 30, 2009, the Bank assumed the assets, liabilities and businesses of the Hanoi branch and Ho Chi Minh City sub branch of Chinfon Bank, effective on March 6, 2010, with the relevant authorities' approval and then completed the settlement procedure.

On December 31, 2013, the Bank acquired 10% equity interest in First Sino Bank ("FSB", which was renamed Fubon Bank (China) in April 2014) and acquired an additional 41% equity interest on January 7, 2014. With the Bank's 51% interest in FSB, the Bank became FSB's parent company.

The board of directors of the Bank and Taipei Fubon Bank Life Insurance Agency Co., Ltd. decided to merge the Bank and Taipei Fubon Bank Life Insurance Agency Co., Ltd. to strengthen their operating synergies, with the Bank as the surviving entity. The Bank has set April 29, 2016 as the effective date of the merger.

Under its business license, the Bank engages in all commercial banking operations authorized under the Banking Act.

As of December 31, 2017, the Bank had a trust department, an offshore banking unit ("OBU"), 127 domestic branches (including a business department) and 5 overseas branches.

The operations of the Bank's Trust Department include: (1) planning, managing and operating a trust business; and (2) custodianship of nondiscretionary trust funds in foreign securities and mutual funds. These operations are regulated under the Banking Act and Trust Law.

Fubon Bank (China) is the joint venture bank founded by the Shanghai Pudong Development Bank and Lotus Worldwide Ltd. on March 20, 1997 in Shanghai Pudong in accordance with "Regulations Governing Foreign Financial Institutions in the People's Republic of China". After a number of capital increases and stock rights changes, as of October 20, 2016, the Bank and FFH's shareholding ratios were 51% and 49%, respectively. Fubon Bank (China) mainly renders foreign currency and RMB services to customers. As of December 31, 2017, Fubon Bank (China) had its headquarters and 25 branches (including preparatory offices) within mainland China.

The Bank's ultimate parent is FFH, which holds all the ordinary shares of the Bank.

The functional currency of the Bank is the New Taiwan dollar, and the consolidated financial statements are presented in New Taiwan dollars.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Bank's board of directors on March 21, 2018.

3. APPLICATION OF NEW AND REVISED STANDARDS, AMENDMENTS AND INTERPRETATIONS

a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Public Banks and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC), and Interpretations of IAS (SIC) (collectively referred to as IFRSs) endorsed and issued into effect by the Financial Supervisory Commission ("FSC")

Except for the following, the initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Public Banks and the IFRSs endorsed and issued into effect by the FSC would not have any material impact on the Bank and its subsidiaries' accounting policies:

Amendment to IAS 36 "Recoverable Amount Disclosures for Non-financial Assets"

The amendment clarifies that the recoverable amount of an asset or a cash-generating unit is disclosed only when an impairment loss on the asset has been recognized or reversed during the period. Furthermore, if the recoverable amount of an item of property, plant and equipment for which an impairment loss has been recognized or reversed is the fair value less costs of disposal, the Bank and its subsidiaries are required to disclose the fair value hierarchy. If the fair value measurements are categorized within Level 2 or Level 3, the valuation technique and key assumptions used to measure the fair value are disclosed. The discount rate used is disclosed if such fair value less costs of disposal is measured by using the present value technique. The amendment should be applied retrospectively from January 1, 2017. Refer to Notes 20 and 21 for related disclosures.

Amendments to the Regulations Governing the Preparation of Financial Reports by Public Banks

The amendments include additions of several accounting items and requirements for disclosures of impairment of non-financial assets as a consequence of the IFRSs endorsed and issued into effect by the FSC. In addition, as a result of the post implementation review of IFRSs in Taiwan, the amendments also include emphasis on certain recognition and measurement considerations and add requirements for disclosures of related party transactions and goodwill.

The amendments stipulate that other companies or institutions of which the chairman of the board of directors or president serves as the chairman of the board of directors or the president of the Bank and its subsidiaries or is the spouse or second immediate family of the chairman of the board of directors or president of the Bank and its subsidiaries are deemed to have a substantive related party relationships, unless it can be demonstrated that no control, joint control, or significant influence exists.

The amendments also require additional disclosure if there is a significant difference between the actual operations after a business combination and the expected benefits on the acquisition date.

b. The Regulations Governing the Preparation of Financial Reports by Public Banks and the IFRSs endorsed by the FSC for application starting from 2018 and the amendments to IFRS 9 for early adoption starting from 2018

New, Amended or Revised Standards and Interpretations	Effective Date

- Note 2: The amendment to IFRS 12 is retrospectively applied for annual periods beginning on or after January 1, 2017; the amendment to IAS 28 is retrospectively applied for annual periods beginning on or after January 1, 2018.
- Note 3: The amendments to IFRS 9 are not yet endorsed by the FSC; however, the FSC permits that entities may elect to early adopt the amendments starting from 2018.

IFRS 9 "Financial Instruments" and related amendments

Classification, measurement and impairment of financial assets

All recognized financial assets that are within the scope of IAS 39 "Financial Instruments: Recognition and Measurement" are subsequently measured at amortized cost or fair value. Under IFRS 9, the requirement for the classification of financial assets is stated below.

For the Bank and its subsidiaries' debt instruments with contractual cash flows that are solely payments of principal and its interest, their classification and measurement are as follows:

- 1) If the debt instruments are held within a business model whose objective is to collect contractual cash flows, the financial assets are measured at amortized cost and are assessed for impairment continually, with any impairment loss recognized in profit or loss. Interest revenue is recognized in profit or loss by using the effective interest method;
- 2) If the debt instruments are held within a business model whose objective is to both collect contractual cash flows and sell financial assets, the financial assets are measured at fair value through other comprehensive income (FVTOCI) and are assessed for impairment. Interest revenue is recognized in profit or loss by using the effective interest method, and other gain or loss is recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses. When the debt instruments are derecognized or reclassified, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

Except for the above, all financial assets are measured at fair value through profit or loss. However, the Bank and its subsidiaries may, on the initial recognition of an equity instrument that is within the scope of IFRS 9 and is not held for trading, irrevocably designate this instrument as at fair value through other comprehensive income, with only dividend income generally recognized in profit or loss. No subsequent impairment assessment is required, and the cumulative gain or loss previously recognized in other comprehensive income cannot be reclassified from equity to profit or loss.

The Bank and its subsidiaries elect to early adopt the amendments to IFRS 9 "Prepayment Features with Negative Compensation" when it first applies IFRS 9. The amendments stipulated that for the purpose of assessing whether contractual cash flows are solely payments of principal and interest on the principal amount outstanding, the prepayment amount of a contractual term may include reasonable compensation that shall be paid or received by either of the parties, i.e. a party may receive reasonable compensation when it chooses to terminate the contract early.

The Bank and its subsidiaries analyzed the facts and circumstances of its financial assets that exist at December 31, 2017 and performed the assessment of the impact of IFRS 9 on the classification and measurement of financial assets. Under IFRS 9:

- 1) Listed shares classified as available-for-sale and unlisted shares measured at cost will be designated as at fair value through other comprehensive income and the fair value gains or losses accumulated in other equity will be transferred directly to retained earnings instead of being reclassified to profit or loss on disposal;
- 2) Beneficiary securities classified as available-for-sale will be classified as at fair value through profit or loss because the contractual cash flows are not solely payments of principal and interest on the principal outstanding and they are not equity instruments;
- 3) Debt investments classified as available-for-sale and using hedge accounting will be classified as measured at amortized cost under IFRS 9 because, on initial recognition, the contractual cash flows are solely payments of principal and interest on the principal outstanding and these investments are held within a business model of hedged item whose objective is to collect contractual cash flows;
- 4) Debt investments classified as held-to-maturity financial assets or debt investments with no active market measured at amortized cost will be classified as measured at amortized cost under IFRS 9 because, on initial recognition, the contractual cash flows are solely payments of principal and interest on the principal outstanding and these investments are held within a business model whose objective is to collect contractual cash flows;

5) Discount notes classified as discounts and loans will be classified as at fair value through other comprehensive income under IFRS 9, because, on initial recognition, the contractual cash flows are solely payments of principal and interest on the principal outstanding and these investments are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets.

IFRS 9 requires the recognition of impairment losses on financial assets using the expected credit loss model. The expected credit loss allowance is required for certain financial assets measured at amortized cost, financial assets mandatorily measured at FVTOCI, certain lease receivables, contract assets within the scope of IFRS 15 "Revenue from Contracts with Customers", and certain written loan commitments and financial guarantee contracts. A loss allowance for the 12-month expected credit losses is required for a financial asset if its credit risk has not increased significantly since initial recognition. A loss allowance for full lifetime expected credit losses is required for a financial asset if its credit risk has increased significantly since initial recognition and is not low. However, a loss allowance for full lifetime expected credit losses is required for certain trade receivables that do not constitute a financing transaction.

In relation to the financial assets, the Bank and its subsidiaries will assess whether there has been a significant increase in the credit risk to determine whether to recognize 12-month or lifetime expected credit losses. In general, the Bank and its subsidiaries anticipate that the application of the expected credit loss model of IFRS 9 will result in earlier recognition of credit losses for financial assets.

The Bank and its subsidiaries elect not to restate prior reporting periods when applying the requirements for the classification, measurement and impairment of financial assets under IFRS 9 with the cumulative effect of the initial application recognized at the date of initial application and will provide the disclosures related to the classification and the adjustment information upon initial application of IFRS 9.

The anticipated impact on assets, liabilities and equity of retrospective application of the requirements for the classification, measurement and impairment of financial assets as of January 1, 2018 is set out below:

Impact on Assets, Liabilities and Equity	Carrying Amount as of December 31, 2017	Adjustments Arising from Initial Application	Adjusted Carrying Amount as of January 1, 2018

Effect on equity	\$	77,112,675	\$	(1,423,369)	<u>\$</u>	75,689,306 (Concluded)	

Hedge accounting

The main changes allow an entity to better reflect its economic hedging activities in its financial statements. Compared with the prior IAS 39, the main changes include: (1) increasing the items eligible for hedge accounting, e.g., risk components of non-financial items can now be eligible for hedging if these components meet certain criteria; (2) allowing derivative instruments to be designated as hedged items under certain conditions in order to reduce profit or loss volatility; and (3) replacing the retrospective quantitative effectiveness assessment with certain criteria, which include the existence of an economic relationship between the hedging instrument and the hedged item.

An assessment of the Bank and its subsidiaries' current hedging relationships indicates that they will qualify as continuing hedging relationships upon application of IFRS 9.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Bank and its subsidiaries assessed that application of other standards and interpretations would not have any material impact on the Bank and its subsidiaries' financial position and financial performance.

c. IFRSs issued by the International Accounting Standards Board (IASB) but not yet endorsed and issued into effect by the FSC

Effective Date
Announced by IASB (Note 1)
January 1, 2019
To be determined by IASB
•
January 1, 2019 (Note 2)
January 1, 2021
January 1, 2019 (Note 3)
January 1, 2019
•
January 1, 2019

- Note 1: Unless stated otherwise, the above New or amended IFRSs are effective for annual periods beginning on or after their respective effective dates.
- Note 2: On December 19, 2017, the FSC announced that IFRS 16 will take effect starting from January 1, 2019.
- Note 3: The Bank and its subsidiaries shall apply these amendments to plan amendments, curtailments of settlements occurring on or after January 1, 2019.

IFRS 16 "Leases"

IFRS 16 sets out the accounting standards for leases that will supersede IAS 17 and a number of related interpretations.

Under IFRS 16, if the Bank and its subsidiaries are lessees, they shall recognize right-of-use assets and lease liabilities for all leases on the consolidated balance sheets except for low-value and short-term leases. The Bank and its subsidiaries may elect to apply the accounting method similar to the accounting for operating leases under IAS 17 to low-value and short-term leases. On the consolidated statements of comprehensive income, the Bank and its subsidiaries should present the depreciation expense charged on right-of-use assets separately from the interest expense accrued on lease liabilities; interest is computed by using the effective interest method. On the consolidated statements of cash flows, cash payments for the principal portion of lease liabilities are classified within financing activities; cash payments for the interest portion are classified within operating activities.

The application of IFRS 16 is not expected to have a material impact on the accounting of the Bank and its subsidiaries as lessor.

When IFRS 16 becomes effective, the Bank and its subsidiaries may elect to apply this Standard either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of the initial application of this Standard recognized at the date of initial application.

In addition to the above effects, as of the date the consolidated financial statements were authorized for issue, the Bank and its subsidiaries continue to evaluate other possible effects of other standards or amendments on the financial position and financial performance. The relevant impact will be disclosed when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, the guidelines issued by the authority, and IFRSs as endorsed and issued by the FSC.

Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis, except for financial instruments and investment properties that are measured at fair value.

The fair value measurements are grouped into Levels 1 to 3, described below, on the basis of the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety.

a. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;

- b. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- c. Level 3 inputs are unobservable inputs for the asset or liability.

Classification of Current and Non-current Assets and Liabilities

Since the Bank's accounts are a major part of the consolidated accounts and the operating cycle in the banking industry cannot be clearly identified, accounts included in the consolidated financial statements of the Bank and its subsidiaries were not classified as current or non-current. Nevertheless, accounts were properly categorized in accordance with the nature of each account and sequenced by their liquidity. Refer to Note 50 for the maturity analysis of assets and liabilities.

Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Bank and the entities controlled by the Bank (i.e., its subsidiaries).

Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the effective date of acquisition up to the effective date of disposal, as appropriate.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Bank and its subsidiaries.

All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation.

The total comprehensive income of subsidiaries is attributed to the owners of the Bank and to the non-controlling interests even if this attribution results in the non-controlling interests having a deficit balance.

See Note 15 for the detailed information of subsidiaries (including the percentages of ownership and main businesses).

Foreign Currencies

In the preparation of the financial statements of each Group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Nonmonetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Nonmonetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising from settlement are recognized in profit or loss in the period in which they arise. Exchange differences on monetary items arising from translation at period-end are recognized in profit or loss, but cash flow hedges or effective portions of the hedging of net investments in foreign operations are recognized in other comprehensive income.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss. When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Bank's foreign operations are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising are recognized in other comprehensive income and accumulated in equity (attributed to the owners of the Bank and non-controlling interests as appropriate).

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, demand deposits, time deposits that can be readily terminated without the reduction of principal, and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows, cash and cash equivalents include cash and cash equivalents in balance sheets, and those amounts due from the Central Bank and call loans to other banks and securities purchased under resell agreements that meet the definition of cash and cash equivalents in IAS 7 "Statement of Cash Flows", etc.

Investment in Associates

An associate is an entity over which the Bank and its subsidiaries have significant influence and that is neither a subsidiary nor an interest in a joint venture.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, an investment in an associate is initially recognized at cost and adjusted thereafter to recognize the Bank and its subsidiaries' share of the associate's profit or loss and other comprehensive income. The Bank and its subsidiaries also recognize the changes in the Bank and its subsidiaries' share of equity of the associates.

Any acquisition cost in excess of the Bank and its subsidiaries' share of the net fair value of the identifiable assets and liabilities of an associate or a joint venture at the date of acquisition is recognized as goodwill, which is included in the carrying amount of the investment and is not amortized. Any Bank and its subsidiaries' share of the net fair value of the identifiable assets and liabilities in excess of the cost of acquisition, after reassessment, are recognized immediately in profit or loss.

The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

Financial Instruments

Financial assets and financial liabilities are recognized when the Bank and its subsidiaries become parties to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

1) Measurement category

Financial assets are classified into financial assets at fair value through profit or loss; held-to-maturity investments; available-for-sale financial assets; and loans and receivables.

a) Financial assets at fair value through profit or loss

Financial assets are classified as at fair value through profit or loss when the financial asset is either held for trading or designated as at fair value through profit or loss.

A financial asset may be designated as at fair value through profit or loss upon initial recognition if:

- i. This designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- ii. The financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Bank and subsidiaries' documented risk management or investment strategy, and information on this grouping is provided internally on that basis; or
- iii. The contract contains one or more embedded derivatives so that the entire hybrid (combined) contract can be designated as at fair value through profit or loss. Fair value is determined in the manner described in Note 49.

Financial assets at fair value through profit or loss are stated at fair value, and gains or losses arising on remeasurement are recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial assets. Fair value is determined in the manner described in Note 49.

b) Held-to-maturity financial assets

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates, and the Bank and its subsidiaries have the positive intent and ability to hold these assets to maturity. On initial recognition, these assets are not designated as at fair value through profit or loss or as available for sale nor do they meet the definition of loans and receivables.

After initial recognition, held-to-maturity investments are measured at amortized cost using the effective interest method less any impairment.

c) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are not classified as loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss.

Available-for-sale financial assets are measured at fair value. Changes in the carrying amount of available-for-sale monetary financial assets relating to changes in foreign currency exchange rates, interest income calculated using the effective interest method and dividends on available-for-sale equity investments are recognized in profit or loss. Other changes in the carrying amount of available-for-sale financial assets are recognized in other comprehensive income and will be reclassified to profit or loss when the investment is disposed of or is determined to be impaired.

Dividends on available-for-sale equity instruments are recognized in profit or loss when the Bank and its subsidiaries' right to receive the dividends are established.

Available-for-sale equity investments with no quoted market prices in an active market and with fair values that cannot be reliably measured and derivatives that are linked to and must be settled by delivery of these unquoted equity investments are measured at cost less any identified impairment loss at the end of each reporting period and are recognized in a separate line item as financial assets carried at cost. If, subsequently, the fair value of the financial assets can be reliably measured, the financial assets are remeasured at fair value. The difference between the carrying amount and fair value is recognized in profit or loss or other comprehensive income on financial assets. Any impairment losses are recognized in profit and loss.

d) Loans and receivables

Loans and receivables (discounts and loans, trade receivables, cash and cash equivalents, debt investments with no active market, etc.) are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.

2) Impairment of financial assets

Financial assets, other than those at fair value through profit or loss, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investments have been negatively affected.

The objective evidence of impairment could include significant financial difficulty of the issuer or counterparty, breach of contract (such as a default or a delinquency in interest or principal payments), it becoming that the borrower will undergo bankruptcy or financial reorganization, or the disappearance of an active market for financial asset because of financial difficulties.

a) Financial assets carried at amortized cost

Certain categories of financial assets, such as loans and receivables, are assessed for impairment collectively even if they had been assessed as not impaired individually. Objective evidence of impairment for a portfolio could include the Bank and its subsidiaries' past experience of collecting payments and an increase in the number of delayed payments in the portfolio, as well as observable changes in national or local economic conditions that correlate with default on discounts and loans and receivables.

Impairment loss is recognized as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

If the impairment loss decreases and the decrease can be related objectively to an event occurring after impairment recognition, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed, does not exceed what the amortized cost would have been had the impairment not been recognized.

Under the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Nonperforming/Nonaccrual Loans" (the "Regulations") issued by the authorities, the Bank assesses the recoverability of credit assets on the basis of a customer's financial position, delinquency in interest or principal payments, and the Bank's internal valuation of collaterals.

Under the Regulations, the Bank categorizes credit assets (other than loans to the ROC government) into normal, special mention, substandard, doubtful, and loss, for which minimum provisions are 1%, 2%, 10%, 50%, and 100%, respectively. In addition, under FSC guidelines No. 10010006830, there should be a provision at more than 1% of the sum of a minimum allowance for credit losses and the provision for losses on guarantees. Based on Rule No. 10300329440 issued by the FSC, for the banks to have enhanced risk coverage, the minimum provision for the loan loss reserve is 1.5% of the mortgage and construction loans that have been classified as normal assets. Based on Rule No. 10410001840 issued by the FSC, for the Bank to have an enhanced control of the exposure to risk in mainland China, the minimum provision for the loan loss reserve is 1.5% of the loans that were granted to companies based in mainland China and classified as normal assets.

Under the loan risk classification guidelines of the China Banking Regulatory Commission, (CBRC), Fubon Bank (China) classifies its credit assets into normal, concern, subprime, doubtful, and losses. Based on the CBRC's "Administrative Measures for the Loan Loss Reserves of Commercial Banks", the basic provision requirement for loan loss coverage is 2.5% and the minimum allowance for bad debts is 150%. The higher of the amounts corresponding to these two ratios is the amount that should be provided as the loan loss reserve of a commercial bank; thus, Fubon Bank (China) assesses its credit assets for both individual and collective impairment and complies with these ratio requirements for its minimum reserve.

Credits deemed uncollectible may be written off if the write-off is approved by the board of directors. Recoveries of amounts previously written off are credited to the allowance account.

b) Available-for-sale financial assets

For an available-for-sale equity investment, a significant or prolonged decline in the fair value of the security below its cost is considered an objective evidence of impairment.

When an available-for-sale financial asset is considered impaired, the cumulative gain or loss previously recognized in other comprehensive income is reclassified to profit or loss in the impairment period.

For an available-for-sale equity security, impairment loss previously recognized in profit or loss is not reversed through profit or loss. Any increase in fair value after an impairment loss is recognized in other comprehensive income and accumulated under the heading of investment revaluation reserve. For available-for-sale debt securities, an impairment loss is reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after impairment loss recognition.

c) Financial assets carried at cost

For financial assets that are carried at cost, impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. This impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced through the use of an allowance account. When a financial asset is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss

3) Derecognition of financial assets

The Bank and its subsidiaries derecognize a financial asset only when the contractual rights to the cash flows from the asset expire, or when they transfer the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Bank and its subsidiaries neither transfer nor retain substantially all the risks and rewards of ownership and continue to control the transferred asset, the Bank and its subsidiaries recognize their retained interest in the asset and an associated liability for amounts they may have to pay. If the Bank and its subsidiaries retain substantially all the risks and rewards of ownership of a transferred financial asset, the Bank and its subsidiaries continue to recognize the financial asset and also recognize a collateralized borrowing for the proceeds received.

On the full derecognition of a financial asset, the difference between (a) the asset's carrying amount and the sum of the consideration received or receivable and (b) the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss.

On the partial derecognition of a financial asset (e.g., when the Bank and its subsidiaries retain an option to repurchase part of a transferred asset), the Bank and its subsidiaries allocate the previous carrying amount of the financial asset between the part they continue to recognize under continuing involvement and the part they no longer recognize on the basis of the respective fair values of these parts on the date of the transfer. The difference between (a) the carrying amount allocated to the part that is no longer recognized and the sum of the consideration received for this part and (b) any cumulative gain or loss allocated to it that had been recognized in other comprehensive income is recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is no longer recognized on the basis of their respective fair values.

b. Equity instruments

Debt and equity instruments issued by the Bank and its subsidiaries are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and whether the instruments meet the definitions of a financial liability or an equity instrument.

Equity instruments issued by the Bank and its subsidiaries are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Bank's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of these repurchased instruments.

c. Financial liabilities

1) Subsequent measurement

Except for the following, all financial liabilities are measured at amortized cost using the effective interest method, less any impairment:

a) Financial liabilities at fair value through profit or loss

Financial liabilities are classified as at fair value through profit or loss when the financial liability is either held for trading or designated as at fair value through profit or loss.

Financial liabilities held for trading are stated at fair value, with any gain or loss arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest or dividend paid on the financial liability. Fair value is determined in the manner described in Note 49.

A financial liability may be designated as at fair value through profit or loss upon initial recognition when doing so results in more relevant information and if:

- i. This designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- ii. The financial liability forms part of a group of the Bank and its subsidiaries' financial assets or financial liabilities or both, and this grouping is managed, and its performance is evaluated, on a fair value basis, in accordance with the Bank and its subsidiaries' documented risk management or investment strategy, and with information on the grouping provided internally on that basis.
- iii. The contract contains one or more embedded derivatives so that the entire combined contract (asset or liability) can be designated as at fair value through profit or loss.

For a financial liability designated as at fair value through profit or loss, if a portion of a change in fair value incorporates any interest or dividend paid on the financial liability, this portion is presented in profit or loss. If a portion of a change in fair value is attributable to changes in the credit risk of the liability, this portion is presented in other comprehensive income, and it will not be subsequently reclassified to profit or loss. The gain or loss accumulated in other comprehensive income will be transferred to retained earnings when the financial liability is derecognized. If this accounting treatment related to credit risk would create or enlarge an accounting mismatch, the total amount of the change in fair value of the liability is presented in profit or loss. Fair value is determined in the manner described in Note 49.

b) Financial guarantee contracts

Financial guarantee contracts issued by the Bank and its subsidiaries are initially measured at their fair values and, if not designated as at fair value through profit or loss, are subsequently measured at the higher of the best estimate of the obligation under the contract or the amount initially recognized less cumulative amortization recognized.

2) Derecognition of financial liabilities

The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

d. Derivative financial instruments

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. When the fair value of derivative financial instruments is positive, the derivative is recognized as a financial asset; when the fair value of derivative financial instruments is negative, the derivative is recognized as a financial liability.

Derivatives embedded in non-derivative host contracts are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the contracts are not measured at fair value through profit or loss.

Hedge Accounting

The Bank and its subsidiaries designate certain hedging instruments, which include derivatives, embedded derivatives and nonderivatives in respect of foreign currency risk, as either fair value hedges or cash flow hedges.

At the start of a hedge relationship, the Bank and its subsidiaries document the relationship between the hedging instrument and the hedged item, along with their risk management objectives and their strategy for undertaking various hedge transactions. Further, at the start of the hedge and on an ongoing basis, the Bank and its subsidiaries document whether the hedging instrument is highly effective in offsetting the exposure to adverse changes in fair values or cash flows of the hedged item. Note 9 sets out the details of the fair values of the derivative instruments used for hedging purposes.

a. Fair value hedges

The change in the fair value of the hedging instrument (e.g., derivative) and the change in the hedged item attributable to the hedged risk are recognized in profit or loss in the line item relating to the hedged item.

Hedge accounting is discontinued when the Bank and its subsidiaries revoke the designated hedging relationship, or when the hedging instrument expires or is sold or terminated, or when it no longer meets the criteria for hedge accounting. The fair value adjustment to the carrying amount of the hedged instrument, for which the effective interest method is used is amortized to profit or loss from the date of the discontinuation of hedge accounting. The adjustment is based on the recalculated effective interest rate at the date amortization begins.

b. Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognized immediately in profit or loss.

The gain or loss recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment in the line item relating to the hedged item in the same period when the hedged item affects profit or loss. If a hedge of a forecast transaction subsequently results in the recognition of a nonfinancial asset or a nonfinancial liability, the gain or loss recognized in other comprehensive income is removed from equity and is included in the initial cost of the nonfinancial asset or nonfinancial liability.

Hedge accounting is discontinued when the Bank and its subsidiaries revoke the designated hedging relationship, or when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer meets the criteria for hedge accounting. The cumulative gain or loss on the hedging instrument that has been previously recognized in other comprehensive income from the period when the hedge was effective remains separately in equity until the forecast transaction occurs. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

Repurchase and Resell Transactions

Securities under repurchase or resell agreement are accounted for as securities sold under repurchase agreements or securities purchased under resell agreements. Related interest expenses and interest income are accrued over the period from the date of sale to the date of repurchase or from the date of purchase to the date of resale.

Property and Equipment

Property and equipment (P&E) are stated at cost, less subsequent accumulated depreciation and subsequent accumulated impairment loss.

Depreciation is recognized using the straight-line method. Each part of a P&E item with a cost that is significant in relation to the total cost of the item is depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for prospectively.

On derecognition of an item of property and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

Investment Properties

Investment properties are properties held for earning rentals and/or for capital appreciation.

Investment properties are measured initially at cost, including transaction costs, and are subsequently measured using the fair value model. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss for the period in which these changes arise.

The decision of the Bank and its subsidiaries to transfer items of property into or out of the classification as investment property depends on the actual use of the assets. The value of a piece of property classified as investment property should be based on its fair value assessment when transferring it to investment property and it should be reclassified appropriately. The accounting treatment for the change in use is subject to IAS 40 "Investment Property".

On derecognition of an item of investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as of the date of acquisition less accumulated impairment loss.

For the purposes of impairment testing, goodwill is allocated to each of the cash-generating units of the Bank and its subsidiaries that are expected to benefit from the synergies resulting from the business acquisition.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually-or more frequently when there is an indication that the unit may be impaired-by comparing its carrying amount, including the allocated goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit has been acquired in a business combination during the current annual period, this unit should be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is first used to reduce the carrying amount of any goodwill allocated to the unit and the rest of the impairment loss is then allocated to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss on goodwill is recognized directly in profit or loss, and is not reversed in subsequent periods.

If goodwill has been allocated to a cash-generating unit and the entity disposes of an operation within that unit, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal, and is measured on the basis of the respective values of the operation disposed of and the portion of the cash-generating unit retained.

Intangible Assets

a. Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimates accounted for prospectively. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

b. Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value (which is regarded as their cost) at the acquisition date. After initial recognition, these are measured on the same basis as intangible assets that are acquired separately.

c. Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset are recognized in profit or loss.

Impairment of Tangible and Intangible Assets Other than Goodwill

At the end of each reporting period, the Bank and its subsidiaries review the carrying amounts of their tangible and intangible assets, excluding goodwill, to determine for any indication of impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Bank and its subsidiaries estimate the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to the individual cash-generating units; otherwise they are allocated to the smallest group of cash-generating units.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication of asset impairment.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit and loss.

When an impairment loss reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Employee Benefits

a. Short-term employee benefits

Liabilities recognized for short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related employee services.

b. Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered services entitling them to the contributions.

Costs (including service cost, net interest and remeasurement) of the defined benefit plans are determined using the projected unit credit method. Service cost and net interest on the net defined benefit liability (asset) are recognized as employee benefit expense in the period they arise. Remeasurement, comprising actuarial gains and losses, and the return on plan assets (excluding interest), are recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liability (asset) represents the actual deficit (surplus) in the defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

c. Other long-term employee benefits

Other long-term employee benefits are accounted for in the same way as the accounting required for the defined benefit plan, except that remeasurement is recognized in profit or loss.

d. Employee benefit - employees' preferential deposits

The Bank has granted a preferential interest rate to its current employees and retired employees for their deposits within a prescribed amount. The preferential interest rate in excess of market interest rate is considered employee benefits.

Under Article 30 of the "Regulations Governing the Preparation of Financial Reports by Public Banks", if the Bank's preferential deposit interest rate for an employee as stated in the employment contract exceeds the market interest rate, the excess will be subject to IAS 19 "Employee Benefits" upon the employees' retirement. The actuarial valuation assumptions and parameters are based on the guidelines announced by the authorities.

Income Tax

Income tax expense is the sum of the tax currently payable and deferred tax.

a. Current tax

Based on the Income Tax Law, an additional tax at 10% of unappropriated earnings is provided for as income tax in the year the shareholders approve the retention of these earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current period's tax provision.

b. Deferred tax

Deferred tax is calculated on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be used.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates and laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences of how the Bank and its subsidiaries expect, at the end of the reporting period, to recover or settle the carrying amount of their assets and liabilities.

c. Current and deferred taxes for the year

Current and deferred taxes are recognized in profit or loss, but taxes that relate to items recognized in other comprehensive income or directly in equity are also recognized in other comprehensive income or directly in equity respectively.

Recognition of Interest Income and Interest Expense

Except for financial assets and liabilities at fair value through profit or loss, all interest-earning financial assets and interest-bearing financial liabilities are accrued using the effective interest rate method and are accounted for as interest income and interest expense in the consolidated statement of comprehensive income.

Recognition of Service Fee Income and Service Fee Expense

Service fee income and expense are recognized when loans or other services are provided. Service fees on significant projects are recognized when the project has been completed, for instance, loan syndication fees are recognized as revenue when the syndication has been completed. If service fee income and expense are related to provide service on loans, service fee income and expense are either recognized over the period that service is performed or as an adjustment to the effective interest rate on the loans and receivables, mainly depending on the materiality of these loans.

Business Combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as incurred.

Goodwill is measured as the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree in excess of the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Current non-controlling interests, which entitle their holders to a proportionate share of an acquiree's net assets in the event of liquidation, may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Bank and its subsidiaries' accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed by management on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revisions affect only that period, or in the period of the revisions and future periods if the revisions affect both current and future periods.

a. Estimated impairment loss on loans and receivables

The Bank and its subsidiaries review loan portfolios and receivables to assess impairment periodically. In determining whether an impairment loss should be recognized, the Bank and its subsidiaries make judgments on whether there is any evidence of impairment loss. This evidence may include observable data on an adverse change in the payment status of borrowers in the portfolio (e.g. payment delinquency or default) or in the national or economic condition that correlates with defaults on the assets in the portfolio. Management also determines the future cash flows in the portfolio using estimates based on historical loss experience on financial assets grouped on the basis of similar credit risk characteristics. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to decrease any difference between the estimated loss and actual loss.

b. Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The calculation of the value in use requires management to estimate the future cash flows expected to arise from the cash-generating units and to use a discount rate suited to the calculation of the present value of the cash flows. When the actual future cash flows are less than expected, a material impairment loss may arise.

6. CASH AND CASH EQUIVALENTS

	December 31		
	2017	2016	
Cash on hand	\$ 6,420,505	\$ 7,092,730	
Due from other banks	62,006,437	25,043,723	
Notes and checks for clearing	4,895,628	4,093,448	
	<u>\$ 73,322,570</u>	\$ 36,229,901	

Refer to the consolidated statements of cash flows for the reconciliation of the amounts in the consolidated statements of cash flows with the equivalent items reported in the consolidated balance sheets as of December 31, 2017 and 2016.

7. DUE FROM THE CENTRAL BANK AND CALL LOANS TO OTHER BANKS

	December 31		
	2017	2016	
Call loans to banks	\$ 117,407,783	\$ 140,486,547	
Deposit reserves	85,571,233	78,175,024	
Due from the Central Bank - others	11,401,596	48,377,391	
	<u>\$ 214,380,612</u>	<u>\$ 267,038,962</u>	

Under a directive issued by the Central Bank of China, the New Taiwan dollar ("NTD")-denominated deposit reserves are determined by applying a prescribed percentage to the average monthly balances of customers' NTD-denominated deposits. As of December 31, 2017 and 2016, deposit reserves for checking accounts amounted to \$21,746,374 thousand and \$17,567,640 thousand, respectively, and the required deposit reserves amounted to \$34,658,540 thousand and \$32,236,828 thousand, respectively. The deposit reserves for checking accounts are not interest bearing and may be withdrawn anytime. The required deposit reserves are subject to withdrawal restrictions. In addition, foreign-currency deposit reserves are determined at a prescribed percentage of the balances of foreign-currency deposits. These reserves may be withdrawn anytime but bear no interests.

Fubon Bank (China) uses the ending balance of deposits at the end of the month or certain balances reached at the average of 10-day periods as basis for making provisions, as required under the regulations of the People's Bank of China.

Due from the Central Bank and call loans to other banks pledged as collateral are disclosed in Note 45.

8. FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS

	December 31		
	2017	2016	
Held-for-trading financial assets			
Government bonds	\$ 24,038,654	\$ 9,384,710

	28,070,893	68,334,458	
	\$ 28,070,893	\$ 68,434,376 (Concluded)	

The Bank and its subsidiaries engage in derivative transactions mainly to accommodate customers' needs, manage their exposure positions, and meet their fund needs in different currencies.

The above financial assets were designated as at fair value through profit or loss because the assets were hybrid instruments or because this designation eliminated or significantly reduced a measurement or recognition inconsistency.

The contract (notional) amounts of the Bank and its subsidiaries' outstanding derivative financial instruments as of December 31, 2017 and 2016 are summarized as follows:

	December 31		
	2017	2016	
Currency swap contracts	\$ 2,994,791,085	\$ 3,194,066,410	
Interest rate swap contracts	850,840,735	1,046,366,821

Forward contracts	110,355,823	110,716,279	
Option contracts	71,651,700	461,500,988	
Future contracts	26,644,383	69,837,783	
Equity swap contracts	11,114,397	11,403,174	
Commodity swap contracts	4,020,236	1,360,045	

Gains on financial assets and liabilities at fair value through profit or loss for the years ended December 31, 2017 and 2016 were as follows:

	For the Year Ended December 31		
	2017	2016	
Net gain on held-for-trading financial assets and liabilities Net (loss) gain on financial assets designated as at fair value through	\$ 5,668,176	\$ 2,768,827	
profit or loss	(25,686)	462,867	
	\$ 5,642,490	\$ 3,231,694	

Held-for-trading financial assets sold under repurchase agreements are disclosed in Note 26, and those pledged as collateral are disclosed in Note 45.

9. DERIVATIVE FINANCIAL INSTRUMENTS FOR HEDGING

	December 31		
	2017	2016	
Derivative financial assets for hedging			
Fair value hedge - interest rate swap	<u>\$ 1,048,870</u>	<u>\$ 412,743</u>	
Derivative financial liabilities for hedging			
Fair value hedge - interest rate swap	<u>\$ 1,369,923</u>	<u>\$ 1,239,999</u>	

Fair Value Hedges

The Bank and its subsidiaries are exposed to the risk of adverse fair value fluctuations due to changes in interest rates for the corporate bonds, bank debentures included in available-for-sale financial assets and bank debentures issued. Since the risk is considered material, the Bank and its subsidiaries enter into interest rate swap contracts to hedge against this risk.

		December 31			
		20	17	20	16
Hedged Item	Hedging Instrument	Nominal Amount	Fair Value	Nominal Amount	Fair Value
Bank debentures	Interest rate swap contract	\$ 48,328,858	\$ (265,408)	\$ 34,161,018	\$ (609,639)

16. INVOLVEMENT WITH UNCONSOLIDATED STRUCTURED ENTITIES

a. The unconsolidated structured entity held by the Bank and its subsidiaries is shown below. The funds are from the Bank and its subsidiaries and external third parties:

Type of Structured Entity	Nature and Purpose	Equity Attributable to the Bank and its subsidiaries
Asset securitization	Investment in asset securitization	Investment in the securities issued by
	for investment gain	unconsolidated structured entities
Trust plan	Investment in trust plans for	Investment in the beneficial right of
	investment gain	trust issued by unconsolidated
		structured entities

b. The carrying amounts of the Bank and its subsidiaries' involvement with the structured entity, which were recognized in the consolidated balance sheets as of December 31, 2017 and 2016, were as follows:

	December 31			
	2017		2016	
Asset securitization				
Available-for-sale financial assets	\$	463,569	\$	910,780
Held-to-maturity financial assets		400,659		554,884
Financial assets at fair value through profit or loss		300,362		350,966
Trust plan				
Available-for-sale financial assets		137,385		<u>-</u>
	<u>\$</u>	<u>1,301,975</u>	<u>\$</u>	<u>1,816,630</u>

The amount of the maximum exposure to loss is the carrying amount of the assets held by the Bank.

c. The Bank and its subsidiaries did not provide any financial support to the unconsolidated structured entity for the years ended December 31, 2017 and 2016.

17. INVESTMENTS ACCOUNTED FOR USING THE EQUITY METHOD

		December 31			
	2017		2016		
	Amount	%	Amount	%	
Associate that is not individually material	<u>\$ 107,775</u>	30	<u>\$ 120,653</u>	30	

Information of associate that is not individually material:

	For the Year Ended December 31			
	2017	2016		
The Bank and its subsidiaries' share of:				
Net income	\$ 7,896	\$ 8,171		
Other comprehensive income (loss)	(13,810)	(7,560)		
Total comprehensive income (loss) for the year	<u>\$ (5,914)</u>	<u>\$ 611</u>		

The Bank and its subsidiaries' share of profit and other comprehensive income (loss) of the associate for the years ended December 31, 2017 and 2016 was based on the associate's financial statements for the same reporting periods as those of the Bank, which had been audited by independent auditors.

The above investments measured by equity method are not pledged as security.

18. OTHER FINANCIAL ASSETS, NET

	December 31			
	2017	2016		
Debt instruments with no active markets	\$ 53,939,260	\$ 37,132,528		
Other banks' deposits not qualifying as cash equivalents	42,108,916	13,021,254		
Financial assets carried at cost, net	1,026,646	554,921		
Nonperforming loans transferred from other than loans	126,413	867,701		
Bills purchased	1,233	1,596		
	97,202,468	51,578,000		
Less: Allowance for credit losses (Note 19)	106,475	838,989		
	<u>\$ 97,095,993</u>	\$ 50,739,011		

a. Debt instruments with no active market

	December 31				
	2017	2016			
Bank debentures Corporate bonds	\$ 30,552,336 23,386,924	\$ 26,102,856 11,029,672			
	<u>\$ 53,939,260</u>	\$ 37,132,528			

b. Financial assets at cost, net

	December 31				
	2017	2016			
Unlisted common stocks Nutmeg Saving and Investment Limited Triven Asset Monogement Co., Ltd.	\$ 476,028 225,000	\$ - 225,000			
Taiwan Asset Management Co., Ltd. Taiwan Financial Asset Service Co., Ltd. Financial Information Service Co., Ltd. Factor Cond Investment Holding Co., Ltd.	100,000 91,000	100,000 91,000			
Easy Card Investment Holding Co., Ltd. Others	47,500 118,107 1,057,635	47,500 118,107 581,607			
Less: Accumulated impairment loss	30,989 <u>\$ 1,026,646</u>	<u>26,686</u> \$ 554,921			

The above financial assets carried at cost are classified into available-for-sale financial assets by measurement category.

Management believed that the above unlisted equity investments held by the Bank and its subsidiaries had fair values that could not be reliably measured because the range of reasonable fair value estimates was so significant; thus, these investments were measured at cost less impairment at the end of the reporting period.

Other financial assets sold under repurchase agreements are disclosed in Note 26, and those pledged as collateral are disclosed in Note 45.

19. ALLOWANCE FOR CREDIT LOSSES

The movements of allowance for credit losses and reserve for losses on guarantees for the years ended December 31, 2017 and 2016 are summarized as follows (for more information, refer to Note 50):

		For the Year Ended December 31, 2017						
	Re	eceivables	Discounts and Loans	F	Other inancial Assets	L	eserve for cosses on carantees	Total

The Bank transferred some of its properties into investment properties measured at fair value, and had them revalued at the point of change of use. However, the recoverable amount of \$100 thousand was lower than the carrying amount; thus, an impairment loss of \$199 thousand was recognized for the year ended December 31, 2017.

The Bank determined the recoverable amount on the basis of the fair value less costs of disposal. The fair value of the recoverable amount was categorized as a Level 3 measurement and was measured using the income approach. Refer to Note 21 for the valuation techniques and key assumptions applied for the purpose of fair value measurement.

The above items of property, plant and equipment were depreciated on a straight-line basis over their estimated useful lives, as follows:

Buildings	40-61 years
Machinery and computer equipment	3-16 years
Transportation equipment	3-6 years
Office and other equipment	3-47 years
Leasehold impairments	1-22 years

21. INVESTMENT PROPERTIES

	December 31			
Item	2017	2016		
Land Buildings	\$ 2,562,120 <u>328,780</u>	\$ 2,337,145 304,355		
	<u>\$ 2,890,900</u>	\$ 2,641,500		

The movements of investment properties are shown below:

	For the Year Ended December 31			
	2017	2016		
Balance, beginning of the year Disposal Reclassification (Loss) gain on change in fair value of investment properties	\$ 2,641,500 - 230,731 	\$ 2,746,700 (34,700) (33,700) (36,800)		
Balance, end of the year	\$ 2,890,900	<u>\$ 2,641,500</u>		

The investment properties were leased out as operating leases with terms of 3 to 10 years. Some of the lease contracts included clauses requiring the lessees to pay contingent rentals at a specified percentage every year.

The fair values of the investment properties as of December 31, 2017 and 2016 were based on the valuations carried out on these dates by independent qualified professional appraisers, Dai Guang-Ping, Chang Hung-Kai, Chang Yi-Chih and Yeh Yu-Fen, from the real estate appraiser office, Savills plc, a duly certified ROC real estate appraiser.

The fair value of investment properties, except undeveloped land, was measured using the income approach, which included a discounted cash flow analysis. Among the significant assumptions used was that an increase in estimated future net cash inflows or a decrease in discount rates would result in higher fair value.

	December 31			
	2017	2016		
Expected future cash inflows Expected future cash outflows	\$ 4,250,831 (135,521)	\$ 4,004,305 (122,972)		
Expected future cash inflows, net	<u>\$ 4,115,310</u>	\$ 3,881,333		
Discount rate	3.845%	4.345%		

The market rentals in the area where the investment property is located were between \$1 thousand and \$20 thousand per ping.

The expected future cash inflows generated by investment properties included rental income, interest income on rental deposits and disposal value. Thus, rental income was extrapolated using the Bank's current lease agreements and market rentals, taking into account the annual rental growth rate and an income analysis covering 10 years, with the interest income on rental deposits extrapolated using the interest rate for 1 year; the disposal value was determined using the direct capitalization method under the income approach. The expected future cash outflows incurred by investment properties included expenditures such as land value taxes, house taxes, insurance premium, and maintenance costs. These expenditures were extrapolated on the basis of the current level of expenditures, taking into account the future adjustment to the government-announced land value and the tax rate promulgated under the House Tax Act.

For the years ended December 31, 2017, the discount rate was based on the interest rate for two-year time deposits as posted by Chunghwa Post Co., Ltd., plus 0.75%, and an asset-specific risk premium of 2%.

For the years ended December 31, 2016, the discount rate was based on the interest rate for two-year time deposits as posted by Chunghwa Post Co., Ltd., plus 0.75%, and an asset-specific risk premium of 2.5%.

For the years ended December 31, 2017 and 2016, the rental income and direct operating expense from investment properties of the Bank and its subsidiaries were as follows:

	For the Year En	ded December 31
	2017	2016
Rental income	\$ 83,481	\$ 78,108
Direct operating expenses	10,120	9,077

The above core deposits, customer relationships, banking licenses, operating rights, and goodwill from the Bank's acquisitions from the Hanoi branch and Ho Chi Minh City sub branch of Chinfon Bank, which were monitored by Financial Restructuring Fund and Fubon Bank (China).

Except for intangible assets, which have indefinite useful lives, the intangible assets are amortized on a straight-line basis at the following estimated service lives:

Core deposits	10-23 years
Operating rights	97 years
Computer software	3-10 years
Customer relationships	7-14 years

For the purpose of goodwill impairment testing, Fubon Bank (China) and branches in Vietnam were deemed as individual cash generating units, and the recoverable amounts of these branches were determined on the basis of their net fair value. The key assumptions used in the net fair value calculation included the business cycle and prosperity, the overall state of the economy, and the profitability and estimated salvage value of Fubon Bank (China) and the Vietnam branches.

An assessment by the Bank and its subsidiaries as of December 31, 2017 and 2016 showed there was no goodwill impairment.

a. Defined contribution plans

The Bank has a pension plan under the Labor Pension Act (LPA), which is a state-managed defined contribution plan. Under the LPA, monthly contributions to employees' individual pension accounts are at 6% of monthly salaries and wages.

The total expense recognized in profit or loss for the years ended December 31, 2017 and 2016 was \$290,717 thousand and \$282,135 thousand, respectively, which represents contributions payable to these plans by the Bank at rates specified in the rules of the plan.

b. Defined benefit plans

The defined benefit plan adopted by the Bank in accordance with the Labor Standards Law is operated by the government. Pension benefits are calculated on the basis of the length of service and average monthly salaries of the years before retirement. The Bank contributes amounts equal to 2% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Before the end of each year, the Bank assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, the Bank is required to fund the difference in one appropriation that should be made before the end of March of next year. Pension contributions are deposited in the Bank of Taiwan in the committee's name and are managed by the Bureau of Labor Funds, Ministry of Labor ("the Bureau"); the Bank has no right to influence the investment policy and strategy for these contributions.

The Bureau supervises its assets portfolio regularly, makes the portfolio carefully, conducts the investment under the mandated management, strengthens risk management, and adjusts the investment strategies in light of market changes timely to enhance the stable income from its funds. The return generated by the funds should not be below the interest rate for a 2-year time deposit with local banks. The information on the percentages of fair value of plan assets on December 31, 2017 and 2016 is available from the public information of the pension fund of the Bureau.

The amounts included in the consolidated balance sheets in respect of the Bank's defined benefit plans were as follows:

	December 31		
	2017	2016

Through the defined benefit plans under the Labor Standards Law, the Bank is exposed to the following risks:

- 1) Investment risk: The plan assets are invested in domestic/and foreign/equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the Bureau or under the mandated management. However, in accordance with relevant regulations, the return generated by plan assets should not be below the interest rate for a 2-year time deposit with local banks.
- 2) Interest risk: A decrease in the government or corporate bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plan's debt investments.
- 3) Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations were as follows:

	December 31	
	2017	2016
Discount rate	1.250%	1.250%
Expected rate of salary increase	2.250%	2.250%

The expected mortality rate was based on the 5th Mortality Table of Taiwan's life insurance industry prepared by the Taiwan Institute of Insurance.

If there is a possible reasonable change in each of the significant actuarial assumptions and all other assumptions will remain constant, the present value of the defined benefit obligation would increase (decrease) as follows:

	Decem	December 31	
	2017	2016	
Discount rate			
0.5% increase	\$ (171,624)	\$ (166,312)	
0.5% decrease	\$ 185,725	\$ 180,162	
Expected rate of salary increase			
0.5% increase	<u>\$ 179,991</u>	<u>\$ 174,527</u>	
0.5% decrease	\$ (168,081)	\$ (162,813)	

As mentioned above, the sensitivity analysis presented above was based on the assumption that there would be a change in each of the actuarial assumptions and that all other assumptions would remain constant. However, it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated. The change in the present value of the defined benefit obligation was measured using the project unit credit method, and the sensitivity analysis method for the current year was consistent with that for the prior year.

	December 31	
	2017	2016
Expected contributions to the plan for the next year	<u>\$ 43,464</u>	<u>\$ 45,240</u>
Average duration of the defined benefit obligation	11 years	11 years

c. Preferential interest rate plan for employees' deposits

The Bank was obligated to pay retired employees a fixed preferential interest rate for their deposits in conformity with "Rules of Deposits of Taipei Fubon Commercial Bank".

The amounts included in the consolidated balance sheets arising from the Bank's obligations for the employees' preferential deposits were as follows:

	December 31	
	2017	2016
Present value of funded retired benefit obligation Fair value of plan assets	\$ 647,527	\$ 638,283
Net liability arising from retired benefit obligation	<u>\$ 647,527</u>	<u>\$ 638,283</u>

Movements in the net funded retired benefit liability (asset) were as follows:

	Present Value of the Funded Retired Benefit Obligation	Fair Value of the Plan Assets	Net Funded Retired Benefit Liability (Asset)
Balance at January 1, 2016	\$ 613,310	<u>\$ -</u>	\$ 613,310
Service cost			
Past service cost	42,094	-	42,094
Net interest expense	24,532	<u> </u>	24,532
Recognized in profit or loss	66,626	_	66,626
			(Continued)

	Present Value of the Funded Retired Benefit Obligation	Fair Value of the Plan Assets	Net Funded Retired Benefit Liability (Asset)
Remeasurement Actuarial loss - changes in financial assumptions Actuarial loss - experience adjustments Recognized in other comprehensive income Benefits paid	\$ 5,659 2,757 8,416 (50,069)	\$ - 	\$ 5,659 2,757 8,416 (50,069)
Balance at December 31, 2016	<u>\$ 638,283</u>	<u>\$ -</u>	<u>\$ 638,283</u>
Balance at January 1, 2017 Service cost Past service cost Net interest expense Recognized in profit or loss	\$ 638,283 50,926 25,531 76,457	<u>\$</u>	\$ 638,283 50,926 25,531 76,457
Remeasurement Actuarial gain - changes in demographic assumptions Actuarial loss - experience adjustments Recognized in other comprehensive income Benefits paid	(17,585) 1,899 (15,686) (51,527)	- 	(17,585) 1,899 (15,686) (51,527)
Balance at December 31, 2017	<u>\$ 647,527</u>	<u>\$ -</u>	\$ 647,527 (Concluded)

The significant assumptions used for the purposes of the actuarial valuations were as follows:

	December 31	
	2017	2016
Discount rate	4.00%	4.00%
Expected return on employees' deposits	2.00%	2.00%
Withdrawal percentage of preferential deposits	1.33%	1.00%

The expected mortality rate was based on "the 2nd Mortality Table" under Rule No. 10102503831 issued by FSC on March 14, 2012.

If possible reasonable change in each of the significant actuarial assumptions will occur and all other assumptions will remain constant, the present value of the funded retired benefit obligation would increase (decrease) as follows:

	December 31	
	2017	2016
Discount rate		
0.5% increase	\$ (29,984)	\$ (29,652)
0.5% decrease	\$ 32,553	\$ 32,187
Withdrawal percentage of preferential deposits		
0.5% increase	<u>\$ (25,082)</u>	<u>\$ (25,315)</u>
0.5% decrease	<u>\$ 26,984</u>	<u>\$ 27,236</u>

The sensitivity analysis presented above was based on the assumption that there would be a change in each of the actuarial assumptions and that all other assumptions would remain constant. However, it was unlikely that the change in assumptions occurred in isolation of one another as some of the assumptions might have been correlated. The change in the present value of the funded retired benefit obligation was measured by the project unit credit method and the method for sensitivity analysis for the current year was consistent with that for the prior year.

	December 31	
	2017	2016
Average duration of the funded retired benefit obligation	10 years	10 years

d. Defined contribution plans of overseas subsidiaries

To enhance the employee's pension benefits and build a multilevel pension insurance system, Fubon Bank (China) implemented an enterprise annuity plan. The plan is based on the "Enterprise Annuity Trial Measures" and the "Enterprise Annuity Fund Management Trial Measures" and other guidelines. It is aimed at providing long-term incentives to employees and giving them security after retirement.

For the years ended December 31, 2017 and 2016, Fubon Bank (China), the Bank's overseas subsidiary, recognized expenses of \$36,190 thousand and \$24,277 thousand, respectively.

33. OTHER LIABILITIES

	December 31

a. Capital stock

Common stock

	December 31	
	2017	2016
Number of shares authorized (in thousands)	13,000,000	13,000,000
Amount of capital stock authorized	<u>\$ 130,000,000</u>	<u>\$ 130,000,000</u>
Number of shares issued and received (in thousands)	10,651,803	10,651,803
Amount of outstanding and issued shares (par value of NT\$10)	\$ 106,518,023	\$ 106,518,023

On March 18, 2016, the Bank's board of directors, under the shareholders' authorization, changed the Bank's Articles of Incorporation, the capital increase from \$100,000,000 thousand to \$130,000,000 thousand.

On April 25, 2016, the Bank's board of directors, under the shareholders' authorization, resolved to capitalize \$8,479,147 thousand of retained earnings and to issue 847,915 thousand shares. On July 20, 2016, these transactions were approved by Financial Supervisory Commission, and the record date was August 3, 2016.

b. Capital surplus

	December 31	
	2017	2016
Arising from consolidation Arising from issuance of common shares	\$ 7,490,431 <u>7,310,496</u>	\$ 7,490,431 7,310,496
	<u>\$ 14,800,927</u>	<u>\$ 14,800,927</u>

The capital surplus arising from shares issued in excess of par (from the issuance of common shares, issuance of shares in a business combination, and treasury stock transactions, etc.) and donations may be used to offset a deficit; in addition, when the Bank has no deficit, the capital surplus may be distributed as cash dividends or transferred to capital (limited to a prescribed certain percentage of the Bank's paid-in capital and once a year).

c. Legal reserve

Under the Banking Act, the Bank, when appropriating its earnings, should set aside 30% of its after-tax earnings as legal reserve. Based on the Company Law, legal reserve should be appropriated until it equals the Bank's paid-in capital. Legal reserve may be used to offset deficit. If the Bank has no deficit and the legal reserve exceeds 25% of its paid-in capital, the excess may be transferred to capital or distributed in cash. In addition, based also on the Banking Act, when the legal reserve equals the Bank's paid-in capital, the maximum amounts that may be distributed in cash should not exceed 15% of the Bank's paid-in capital.

d. Special reserve

	December 31	
	2017	2016
Appropriations by TAIPEIBANK under its Articles of		
Incorporation	\$ 1,285,676	\$ 1,285,676
Transferred from trading loss reserve	123,497	123,497
Arising from the first-time adoption of IFRSs	126,525	126,525
Application of the fair value model to investment properties	1,064,442	1,116,376
Expenditure of employees' financial technology development	71,882	_
	\$ 2,672,022	\$ 2,652,074

Under Rule No. 1010012865 issued by the FSC on April 6, 2012 and the directive titled "Questions and Answers for Special Reserves Appropriated Following the Adoption of IFRSs," on the first-time adoption of IFRSs, a company should appropriate to a special reserve an amount that is the same as the sum of unrealized revaluation increment and cumulative translation differences (gains) transferred to retained earnings as a result of the company's use of exemptions under IFRS 1. However, at the date of transition to IFRSs, if the increase in retained earnings that resulted from all IFRSs adjustments is not sufficient for this appropriated, only the increase in retained earnings that resulted from all IFRSs adjustments will be appropriated to special reserve. The special reserve appropriated as above may be reversed to retained earnings in proportion to the usage, disposal or reclassification of the related assets and thereafter distributed. The special reserve appropriated on the first-time adoption of IFRSs may be used to offset deficits in subsequent years. Earnings should be appropriated until any shortage of

the aforementioned special reserve is appropriated in subsequent years if the company has earnings and the original need to appropriate a special reserve is not eliminated.

The increase in retained earnings that resulted from all IFRSs adjustments was not enough for this appropriation; therefore, the Bank and its subsidiaries appropriated to the special reserve \$126,525 thousand, the increase in retained earnings that resulted from all IFRSs adjustments on transition to IFRSs.

Under Rule No. 10310000140 issued by the FSC on February 19, 2014, if the Public Bank chose the fair value model to investment properties in conformity with the Regulations Governing the Preparation of Financial Reports by Public Banks, the Public Bank should appropriate a special reserve at the amount that was the same as the net increase arising from the fair value measurement and transfer it to retained earnings. The amount appropriated may be reversed to the extent that the cumulative net increases in fair value decrease or on the disposal of investment properties.

Under Rule No. 10510001510 issued by the FSC on May 25, 2016, a public bank shall appropriate to special reserve 0.5% to 1% of net income from 2016 through 2018. From fiscal year 2017, the Bank can reverse the amount of expenditure of employees' transfer arising from financial technology development within the amount of the above special reserve.

e. Appropriation of earnings and dividend policy

Under the Bank's Articles of Incorporation, the Bank should make appropriations from its net income (less any deficit) in the following order:

- 1) 30% as legal reserve and, under FSC rules, a special reserve (or special reserve reversal);
- 2) The remaining net income and unappropriated accumulated earnings can be distributed as dividends to shareholders, as proposed by the board of directors and approved in the shareholders' meeting. If the legal reserve equals the Bank's paid-in capital, or if the Bank meets the standards of sound finance and business practices prescribed by the regulatory authorities as stated in Article 50 of the Banking Act and has set aside legal reserve in compliance with the Company Act, the restrictions stipulated in the preceding paragraph shall not prevail

On November 12, 2009, the FSC prescribed regulations, stated in Article 50 of the Banking Act, for sound finance and business practices. On April 30, 2012, these regulations were amended, specifying the criteria for sound finance and business.

The appropriation of earnings is approved at the shareholders' meeting held in, and reflected in the financial statements of, the year following the year of earnings generation. Under the Financial Holdings Company Law, the Bank's board of directors is designated to exercise the power of the shareholders' meeting, and the regulations on the shareholders' meeting, which are included in the Company Law, will not prevail.

Under the May 2015 amendments to the Company Act, the recipients of dividends and bonuses are limited to shareholders and do not include employees. The consequential amendments to the Bank's Articles of Incorporation were approved by the Bank's board of directors (on behalf of the shareholders' meeting) on March 18, 2016. For information on the accrued employees' compensation and the actual appropriations, refer to Note 39.

Under the Integrated Income Tax System, local residents and corporate shareholders are allowed tax credits equal to their proportionate share of the income tax paid by the Bank on the date of dividend distribution.

On April 26, 2017 and April 25, 2016, the Bank's board of directors exercised the power and authority of the shareholders' meeting and approved the appropriations of the 2016 and 2015 earnings, respectively. The appropriations, including dividends per share, were as follows:

	Appropriatio	n of Earnings		Per Share T\$)
	2016	2015	2016	2015
Legal reserve	\$ 4,312,952	\$ 5,334,897		
Special reserve	19,948	99,416		
Stock dividends	-	8,479,147	\$ -	\$ 0.86
Cash dividends	10,043,605	3,633,920	0.94	0.37

The appropriations of earnings for 2017 had been proposed by the Bank's board of directors on March 21, 2018. The appropriations and dividends per share were as follows:

	Appropriation of Earnings	Dividends Per Share (NT\$)
Legal reserve	\$ 4,985,251	
Special reserve	309,714	
Cash dividends	11,309,962	\$1.06

The appropriations of earnings for 2017 are subject to the resolution of the Bank's board of directors (on behalf of the shareholders' meeting).

f. Other equity items

1) Exchange differences on translation of foreign financial statements

	For the Year Ended December 31	
	2017	2016

Government bonds	59,808	36,345
Bank debentures	22,762	430,560
Others	(414)	11,992
	<u>\$ 1,578,190</u>	<u>\$ 825,655</u>

39. EMPLOYEE BENEFITS EXPENSE

	For the Year Ended December 31	
	2017	2016
Salaries and wages	\$ 10,013,737	\$ 9,829,094
Labor insurance, national health insurance, and group life insurance	871,943	820,964
Post-employment benefit expense	486,753	460,904
Other employee benefits expense	523,421	492,250
	<u>\$ 11,895,854</u>	\$ 11,603,212

To be in compliance with the Company Act amended in May 2015 and the Articles of Incorporation amended by the Bank's board of directors (on behalf of the shareholders' meeting) on March 18, 2016, the Bank stipulates the distribution of employees' compensation at the rates from 1% to 5% of net profit before income tax, but the Bank should not make appropriations from earnings if it has a deficit. Based on the employees' compensation rate of 1%, on March 21, 2018 and March 22, 2017, the Bank's board of directors approved the amounts of \$188,848 thousand and \$170,468 thousand as employees' compensation for the years 2017 and 2016, respectively.

If there is a change in the proposed amounts after the annual consolidated financial statements are authorized for issue, the differences are recorded as a change in accounting estimate.

On March 22, 2017 and March 18, 2016, the Bank's board of directors proposed amounts of employees' compensation that were the same as the accrued amounts reflected in the consolidated financial statements for the years ended December 31, 2016 and 2015.

Information on the appropriation of earnings is available at the Market Observation Post System website of the Taiwan Stock Exchange.

40. DEPRECIATION AND AMORTIZATION EXPENSE

	For the Year Ended December 31	
	2017	2016
Depreciation Amortization	\$ 973,534 813,783	\$ 911,853 <u>804,200</u>
	<u>\$ 1,787,317</u>	\$ 1,716,053

41. OTHER GENERAL AND ADMINISTRATIVE EXPENSE

	For the Year Ended December 31	
	2017	2016
Taxation and government fee	\$ 1,549,879	\$ 1,728,278
Rental	1,416,432	1,452,218
Equipment repair	720,903	679,450
Marketing	701,157	636,681
Insurance	546,425	530,327
Others	2,569,930	2,635,107
	<u>\$ 7,504,726</u>	<u>\$ 7,662,061</u>

42. INCOME TAX

Since 2003, Fubon Financial Holdings Co., Ltd. and its eligible subsidiaries, including the Bank, has been using the linked-tax system for filing regular corporate income tax and 10% income tax on undistributed earnings.

a. Income tax recognized in profit or loss

The major components of income tax expense were as follows:

	For the Year Ended December 31	
	2017	2016
Current tax		
Current year	\$ 2,404,201	\$ 3,004,399
Prior years	(184,185)	42,008
·	2,220,016	3,046,407
Deferred tax		
Current year	111,508	568
Income tax expense recognized in profit or loss	<u>\$ 2,331,524</u>	\$ 3,046,975

A reconciliation of accounting profit and current income tax expense is as follows:

	For the Year Ended December 31	
	2017	2016
Income tax expense calculated at statutory rate (17%)	\$ 3,274,578	\$ 3,114,182
Tax-exempt income	(1,343,620)	(1,049,623)
Unqualified items in determining taxable income	153,051	211,073
Additional income tax under the Alternative Minimum Tax Act	188,884	90,540
Effect of differences in domestic and overseas tax rates	208,189	655,635
Unrecognized deductible temporary differences	10,240	(30,471)
Others	(159,798)	55,639
Income tax expense recognized in profit or loss	\$ 2,331,524	\$ 3,046,975

In February 2018, it was announced by the President that the Income Tax Act in the ROC was amended and, starting from 2018, the corporate income tax rate will be adjusted from 17% to 20%. In addition, the rate of the corporate surtax applicable to 2018 unappropriated earnings will be reduced from 10% to 5%. Deferred tax assets and liabilities recognized as of December 31, 2017 are expected to increase by \$79,895 thousand and \$110,386 thousand in 2018, respectively, due to the adjusted tax rate.

b. Income tax recognized in other comprehensive income

	For the Year Ended December 31	
	2017	2016
Deferred tax		
Recognized in other comprehensive income Remeasurement of defined benefit plan Unrealized gains (losses) on available-for-sale financial assets Property revaluation increments	\$ 35,362 130,837 (6,134)	\$ 18,403 12,492
	<u>\$ 160,065</u>	\$ 30,895

c. Current tax assets and liabilities

	Decem	iber 31
	2017	2016
Current tax assets

	\$ 945,753	\$ (50,839)	\$ -	<u>\$ (24)</u>	<u>\$ 894,890</u>

- e. The information on the integrated income tax system is as follows:
 - 1) The Bank had no unappropriated earnings generated before January 1, 1998.
 - 2) The information on the imputation credit account is as follows:

	December 31		
	2017	2016	
The Bank	\$ 94,722	<u>\$ 295,416</u>	

3) Creditable tax ratio

The Bank's actual creditable tax ratio for cash dividend distribution from the 2016 earnings was 1.42%.

Based on legal interpretation No. 10204562810 announced by the Taxation Administration of the Ministry of Finance, in the calculation of imputation credits in the year of the first-time adoption of IFRSs, the cumulative retained earnings include the net increase or net decrease in retained earnings arising from the first-time adoption of IFRSs. Thus, the actual imputation credits to be allocated to shareholders of the Bank are limited to the balance of the imputation credit account as of the date of dividend distribution.

Since the amended income tax act announced in February 2018 abolished the imputation tax system, no information for 2017 is applicable.

- f. The income tax returns of the Bank through 2013 were assessed by the Taipei National Tax Administration (TNTA). The Bank disagreed with the tax authorities' assessment of the Bank's 2010 and 2012 additional amount returns on its sports lottery program and applied for a re-examination.
- g. Income tax returns of Fubon Bank (China) through 2016 had been assessed by Shanghai Municipal Office, SAT and the Shanghai Municipal Bureau of Local Taxation.

43. EARNINGS PER SHARE

13) Marketing collaboration

The Bank entered into a collaboration arrangement with Fubon Securities for deal settlement of securities, cost sharing, and cross-selling. Under this contract, the expense allocation was based on the average balance that the customers of Fubon Securities deposited in the Bank. The allocation costs for office space that the Bank paid to Fubon Securities were \$297,058 thousand and \$285,639 thousand for the years ended December 31, 2017 and 2016, respectively.

17) Related-party property transactions

In 2017, the Bank sold part of its property which had a carrying amount of \$617,383 thousand to Fubon Asset Management for \$1,310,500 thousand, and recognized a gain on the disposal of property and equipment of \$693,117 thousand. Refer to Table 3 at the end of the notes to these consolidated financial statements for the related information.

Transactions between the Bank and its subsidiaries and related parties were at arm's length, except for the preferential interest rates offered to employees for their savings and loans of up to certain amounts.

Under the Banking Act No.32 and No.33, except for consumer and government loans, credits extended by the Bank to any related party should be fully secured, and the credit terms for related parties should be similar to those for unrelated parties.

45. PLEDGED ASSETS

The following assets had been provided as refundable deposits:

	December 31		
	2017	2016	
Certificates of deposit (included in due from the Central Bank and call loans to other banks)	\$ 4,400,000	\$ 18,500,000	
Government bonds (included in financial assets at fair value through profit or loss)	49,888	49,111	
Government bonds (included in available-for-sale financial assets)	-	152,424	
Negotiable certificates of deposit of the Central Bank (included in			
held-to-maturity financial assets)	24,600,000	10,500,000	
Government bonds (included in held-to-maturity financial assets)	1,982,095	5,811,816	
Pledged time deposits (included in other financial assets)	1,649,234	1,662,725	
	\$ 32,681,217	\$ 36,676,076	

Of the above certificates of deposit (CD) of the Central Bank and negotiable certificates of deposit (NCD) of the Central Bank, some certificates amounting to \$10,000,000 thousand as of December 31, 2017 and 2016 had been provided as collaterals for day-term overdraft to comply with the CB's clearing system requirement for real-time gross settlement (RTGS). The unused overdraft amount at the end of the day may be treated as liquidity reserve. As of December 31, 2017 and 2016, certificates of deposit (CD) of the Central Bank and negotiable certificates of deposit (NCD) of the Central Bank amounting to \$10,000,000 thousand had been provided to the Central Bank as collaterals for the Bank's foreign-currency call loans.

In addition, certificates of deposit (CD) of the Central Bank and negotiable certificates of deposit (NCD) of the Central Bank amounting to \$9,000,000 thousand as of December 31, 2017 and 2016 had been provided to the Mega International Commercial Bank as collaterals for USD clearing transactions.

Other pledged assets had been placed with (a) courts for meeting requirements for judiciary provisional seizure of debtors' property, (b) the National Credit Card Center for the Bank's potential obligations on credit card activities, (c) the Central Bank for the Bank's potential obligations on its trust activities, (d) foreign governments for the Bank's potential obligations on its overseas operations, and (e) counterparties as collaterals of derivatives transactions.

46. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED COMMITMENTS

a. Except for those disclosed in other notes of the accompanying consolidated financial statements, as of December 31, 2017 and 2016, the Bank and its subsidiaries had commitments as follows:

	Decem	ber 31
	2017	2016
Amount of repurchase agreements	\$ 98,521,376	\$ 61,604,524
Amount of resell agreements	16,321,038	27,514,522
Undrawn credit card commitments	256,146,355	244,374,712
Collections for customers	39,701,051	37,251,977
Commissioned deposits	20,613,388	24,965,515
Trust deposits	8,164,848	26,070,025
Entrusted loans	8,164,848	26,070,025
Entrusted financial management	18,702,541	30,188,953
Travelers' checks consigned-in	407,670	501,269
Marketable securities under custody	290,970,013	267,909,186
Trust assets	378,193,650	337,075,394
Management for book-entry government bonds	125,799,500	160,798,000

b. The maturity analysis for operating lease commitments and capital outflow commitments was as follows:

December 31, 2017	Less than 1 Year 1-5 Years		Over 5 Years	Total	
Lease commitments					
Operating lease expenses	\$ 526,055	\$ 1,351,952	\$ 14,549	\$ 1,892,556	
Capital commitments	1,722,725	10,570	-	1,733,295	

December 31, 2016	Less than 1 Year	1-5 Years	Over 5 Years	Total
Lease commitments				
Operating lease expenses	\$ 497,701	\$ 1,061,788	\$ 35,067	\$ 1,594,556
Capital commitments	2,141,463	7,369	-	2,148,832

As of December 31, 2017 and 2016, the refundable deposits paid under operating leases were \$262,883 thousand and \$243,787 thousand, respectively.

c. The Bank sold its Fubon Nei-hu building to Taiwan Land Bank Co., Ltd., the trust company of Fubon No. 2 REITs (real estate investment trusts), and then leased back the building. The disposal gain of \$295,819 thousand was recognized over the three-year lease term.

However, at the end of the lease term in April 2009, the Bank renewed the lease, thereby extending the lease term to another 10 years. Thus, the unrealized profit on the sale and leaseback transaction was recognized over 124 months from January 1, 2009.

47. TRUST BUSINESS UNDER THE TRUST LAW

The trust-related items shown below were managed by the Bank's Trust Department. However, these items were not included in the Bank and its subsidiaries' consolidated financial statements.

48. ALLOCATION OF REVENUE, COST AND EXPENSE RESULTING FROM INTERCOMPANY SHARING OF RESOURCES

The Bank entered into a marketing collaboration agreement with Fubon Financial Holdings Company ("FFH") and its subsidiaries for cross-selling business. The collaboration arrangements include the sharing of office space, manpower, and business support. Cost allocation and payments are made in accordance with cross-selling rules and the contractual agreements with FFH and its subsidiaries.

Refer to Note 44 for the cross-selling revenues and expenses for the years ended December 31, 2017 and 2016.

49. FINANCIAL INSTRUMENTS

a. Fair value

1) Overview

Fair value is the price that would be received to sell assets or paid to transfer liabilities in orderly transactions between market participants at the measurement date.

All financial instruments are initially measured at fair value, which is usually the transaction price in many cases. Financial assets are subsequently measured at fair value, except those measured at amortized cost. Quoted market prices in active markets provide the most reliable evidence of fair value. The fair value of financial instruments is measured by marking-to-model or, if the market is inactive, by referring to the quoted prices from Bloomberg or Reuters or from the counterparty.

2) The levels of the fair value hierarchy are described below:

a) Level 1

Level 1 financial instruments are traded in an active market and have quoted prices for identical assets or liabilities. An active market has the following conditions:

- i. All financial instruments traded in the market are homogeneous.
- ii. Willing buyers and sellers are found in the market all the time.
- iii. The public can access the price information easily.

The products categorized in this level usually have high liquidity or are traded in the futures market or exchanges, such as the spot foreign exchange, listed stocks and Taiwan treasury benchmark index bond.

b) Level 2

The products categorized in this level have the prices that can be inferred from either direct or indirect observable inputs other than active market prices. Examples of these inputs are:

- Quoted prices of similar products in the active market. This means the fair value can be derived from the current trading prices of similar products. The determination of product similarity is based on the financial instrument characteristics and the trading rules. The fair price valuation is subject to adjustments due to differences in prices over time and between market participants and in trading rules;
- ii. Quoted prices of identical or similar financial instruments in inactive markets;
- iii. When marking-to-model, observable inputs other than quoted prices (such as interest rates and yield curves observable at commonly quoted intervals, and implied volatilities), i.e., the inputs can be observed in the market and can reflect the expectation of market participants;
- iv. Inputs derived from or corroborated by observable market data by correlation or other means.

The fair values of the products categorized in this level are based on inputs used for a simple model or valuation model generally accepted by the market. Examples of these products are forward contracts, cross-currency swap, simple interest-earning bonds and simple foreign exchange options.

c) Level 3

The fair prices of Level 3 products, which include financial instruments and investment properties, are based on inputs other than direct market data. For example, historical volatility used in valuing options is an unobservable input because it cannot represent the entire market participants' expectation of future volatility.

The products categorized in this level are complex derivative financial instruments or products with prices provided by brokers, such as complex foreign exchange options, commodity options, and complex interest rate options.

b. Specific financial instruments measured at fair value

1) Fair value hierarchy

The fair values of the Bank and its subsidiaries' financial instruments and properties are measured on a recurring basis. The fair value hierarchy of these financial instruments and investment properties was as follows:

	December 31, 2017

2) Fair value measurement technique

a) Financial instruments

The financial assets should be measured by marking to market, and marking to model should be made only if marking to market is not feasible.

i. Marking-to-market

This method should be employed at the first place. Following are the principles to be observed when using marking-to-market:

- i) Ensure the consistency and integrity of market data.
- ii) The source of market data should be transparent, easy to access, and independent.
- iii) Listed securities with quoted prices should be valued at closing prices.
- iv) Fair values of unlisted securities with no closing prices are based on prices quoted by independent brokers.
- v) The guidelines provided by regulatory authorities should be followed.

ii. Marking-to-model

Marking to model is suggested if marking to market is infeasible. This valuation methodology is based on model inputs to derive the value of trading positions. Senior managers should acknowledge the valuation model scope, uncertainties and effects. In addition to complying with the Bank's regulations regarding model valuation, the Bank should consider the following:

- i) Model inputs should be consistent and complete.
- ii) Valuation models should be made on the basis of proper assumptions. The Bank should also consider its internal control system, market risk management framework and mathematical expertise in making calculations. Moreover, model validation should be implemented by a quantitative trading team that is independent of the market risk-taking unit.
- iii) There should be standard procedures for model alteration and the operation of a backup system, and valuation results should be tested periodically using historical backup data.

The Bank and its subsidiaries' fair value measurement model - such as the Black-Scholes option pricing model or Monte Carlo Simulation - is widely used in the industry. Some valuation model parameters consist of unobservable information in markets. Thus, the Bank and its subsidiaries must make proper fair value estimates based on assumptions. For estimating the impact of parameters based on unobservable data, the Bank's "Quantitative Information on Significant Unobservable Inputs (Level 3)" is used as reference.

b) Non-financial instruments

Fair value of investment properties is measured using the income approach based on the valuations carried out by independent qualified professional appraisers. The related data and inputs are as follows:

- i. Cash flows: The Bank and its subsidiaries evaluate market rentals of comparable properties on the basis of current lease agreements, local rental prices and market similarity, and rule out the values that are too high or too low. In addition, properties with terminal values should add the present value of terminal value to their market rentals.
- ii. Analysis period: The income is measured by 10 years.
- iii. Discount rate: The discount rate is based on the interest rate for two-year time deposits as posted by Chunghwa Post Co., Ltd., plus 0.75% and asset-specific risk premiums.

3) Fair value adjustment

Credit risk value adjustments included in the calculation of the fair value of financial instruments take into account the counterparties' credit risk and the Bank's credit quality.

Credit risk value adjustment means the fair value of derivative contracts reflecting the credit risks of both parties to a transaction. It is mainly divided into credit value adjustments and debit value adjustments.

- a) Credit valuation adjustment (CVA) is used for derivative contracts that are traded over the counter. It is the adjustment required for the value of a derivative asset to reflect the counterparty's credit risk, of the Bank.
- b) Debit valuation adjustment (DVA) is used for derivative contracts that are traded over the counter. It is the adjustment required for the value of a derivative liability to reflect non-performance risk, including credit risk, of the Bank and its subsidiaries.

CVA and DVA are the tools for estimating losses, which are calculated using models with inputs of Probability of Default (PD) and Loss Given Default (LGD) multiplying Exposure at Default (EAD).

The Bank calculates expected loss by multiplying the probability of default (PD) by the loss given default (LGD) by the exposure at default (EAD).

The Bank calculates EAD using the mark-to-market fair value of OTC derivative instruments.

The Bank uses 60% as the PD in accordance with "IFRS 13 CVA and DVA-related Disclosure Guidelines" issued by the Taiwan Stock Exchange.

4) Transfers between Level 1 and Level 2

In 2017 and 2016, the Bank and its subsidiaries had no material transfer between Level 1 and Level 2.

5) Reconciliation of Level 3 items of financial instruments

a) Reconciliation of Level 3 financial assets

For the Year Ended December 31, 2017

		Gains (Losses	on Valuation	Increase Decrease		rease		
Name	Beginning Balance	Profit and Loss	Other Comprehensive Income	Purchase/ Issue	Transfer to Level 3	Disposal/ Sale	Transfer Out of Level 3	Ending Balance
Financial assets at fair value through profit or loss Held-for-trading financial assets Financial assets designated as at fair value through profit	\$ 11,894,560	\$ (7,621,317)	\$ -	\$ 900,973	\$ 120,841	\$ 2,132,351	\$ 477,730	\$ 2,684,976

Investment properties	2,746,700	(36,800)	-	-	-	34,700	33,700	2,641,500

Note: Transfers into Level 3 were due to intensity variation of market information for certain financial assets designated as at fair value through profit or loss and available-for-sale financial assets. Transfers out of Level 3 were due to intensity variation of market information for certain held-for-trading financial assets, financial assets designated as at fair value through profit or loss and available-for-sale financial assets. Transfers out of Level 3 were due to investment property reclassified as property and equipment.

As of December 31, 2017 and 2016, valuation losses of \$658,499 thousand and \$2,644,438 thousand, respectively, were included in profit or loss, and valuation gains of \$40,786 thousand and losses of \$38,648 thousand, respectively, were included in other comprehensive income.

b) Reconciliation of Level 3 financial liabilities

For the Year Ended December 31, 2017

		Valuation	Incr	ease	Deci	rease	
Name	Beginning Balance	Gain/Loss Reflected on Profit or Loss	Purchase/ Issue	Transfer to Level 3	Disposal	Transfer Out of Level 3	Ending Balance
Financial liabilities at fair value through profit or loss Held-for-trading financial							
liabilities	\$ 11,980,240	\$ (7,765,146)	\$ 15,178	\$ -	\$ 1,806,713	\$ -	\$ 2,423,559

For the Year Ended December 31, 2016

		Valuation	Incr	Increase Decrease			
Name	Beginning Balance	Gain/Loss Reflected on Profit or Loss	Purchase/ Issued	Transfer to Level 3	Disposed	Transfer Out of Level 3	Ending Balance
Financial liabilities at fair value through profit or loss Held-for-trading financial							
liabilities	\$ 26,814,093	\$ (9,182,268)	\$ 44,477	\$ -	\$ 5,696,062	\$ -	\$ 11,980,240

As of December 31, 2017 and 2016, valuation gains of \$684,871 thousand and \$2,670,400 thousand, respectively, had been included in profit and loss for liabilities still held.

6) Quantitative information on the significant unobservable inputs (Level 3) used in fair value measurement

Classified under Level 3 were some overseas bonds, foreign asset securitization, credit-linked notes, complex derivatives and investment property.

Financial instruments for which there are significant unobservable inputs are measured using a credit model, a complex interest rate option model and a complex foreign exchange option model. Parameters of the model can be accurately calibrated for the quantitative analysis of financial settings.

Quantitative information on significant unobservable inputs is set out below. However, the positions belonging to third-party source if information (including back-to-back transactions and quotes from Bloomberg BVAL on bonds in foreign currency) and the "Sensitivity Analysis of Fair Value If Reasonably Possible Alternative Assumptions Are Used" are not shown below because the relationship between the significant unobservable inputs and fair values is difficult to be established fully.

December 31, 2017

Name	Products	Fair Value	Valuation Techniques	Significant Unobservable Inputs	Interval (Weighted- average)	Relationships between Inputs and Fair Value
Items measured at fair value based on repeatability:						
Non-derivative items						
Financial assets designated as at fair value through profit or loss	Credit-linked notes (CLN)	\$ 1,102,092	Complex option model	Default recovery rate	10% -90 %	The increase in default recovery rate would result in a decrease in fair value.
Available-for-sale financial assets	Trust plan	137,385	Discounted cash flow method	Real interest rate	5.9 %	The decrease in real interest rate would result in an increase in fair value
Derivative financial assets						
Financial assets at fair value through profit or loss	Foreign exchange option (FX Option)	21,020	Complex foreign exchange option model	Proportion parameter	10% -90 %	The increase in proportion parameter would approximate to stochastic volatility model. Inputs should be regularly reviewed to determine the validity of fair value.
Derivative financial liabilities						
Financial liability at fair value through profit or loss	Foreign exchange op (FX Option)	(16,774)	Complex foreign exchange option model	Proportion parameter	10% -90 %	The increase in proportion parameter would approximate to stochastic volatility model. Inputs should be regularly reviewed to determine the validity of fair value.
Non-financial instruments						
Investment property	Property	2,890,900	Note	Note	Note	Note

December 31, 2016

Name	Products	Fair Value	Valuation Techniques	Significant Unobservable Inputs	Interval (Weighted- average)	Relationships between Inputs and Fair Value
Items measured at fair value based on repeatability:				_		
Non-derivative items						
Financial assets designated as at fair value through profit or loss	Credit-linked notes (CLN)	\$ 1,153,941	Complex option model	Default recovery rate	10% -90%	The increase in default recovery rate would result in a decrease in fair value.
Derivative financial assets						
Financial assets at fair value through profit or loss	Foreign exchange option (FX Option)	92,102	Complex foreign exchange option model	Proportion parameter	10% -90%	The increase in proportion parameter would approximate to stochastic volatility model. Inputs should be regularly reviewed to determine the validity of fair value.
Derivative financial liabilities						
Financial assets at fair value through profit or loss	Foreign exchange op (FX Option)	(5,754)	Complex foreign exchange option model	Proportion parameter	10% -90%	The increase in proportion parameter would approximate to stochastic volatility model. Inputs should be regularly reviewed to determine the validity of fair value.
Non-financial instruments						
Investment property	Property	2,641,500	Note	Note	Note	Note

Note: The fair values of investment properties are measured using the income approach based on the valuations carried out by independent qualified professional appraisers in conformity with the Regulations Governing the Preparation of financial Reports by Public Banks. Refer to Note 21.

7) Valuation processes for Level 3 fair value measurements

The Bank and its subsidiaries' Risk Management Division (the "Division") is responsible for independently verifying fair value, confirming that the information needed is correct and consistent before valuing the financial instruments with the use of models, calibrating measurement models in relation to market prices, and updating the inputs required for models so that the model results will closely approximate market status. In addition to maintaining the accuracy of measurement models, the Division also examines periodically the reasonableness of prices provided by third parties.

Investment property is regularly measured by independent qualified professional appraisers commissioned by Property Management Division in conformity with the Regulations Governing the Preparation of financial Reports by Public Banks.

The Risk Management Division and the Property Management Division make the policies on the fair value valuation of financial instruments and investment properties, respectively, and valuation procedures and ensure that their policies comply with the relevant IFRSs.

8) Sensitivity analysis of Level 3 fair value if reasonably possible alternative assumptions are used

Although the Bank and its subsidiaries believe that their estimates of fair value are appropriate, the use of different methodology or assumptions could lead to different measurements of fair value. For Level 3 fair value measurements, a 10% change in assumptions would have the following effects:

		December 31, 2017

c. Fair value of financial instruments not carried at fair value

1) Fair value information of financial instruments

Financial instruments measured at cost, excluding those in the table below, have carrying amounts that are reasonably close to their fair values; thus, their fair values are not disclosed. Examples of these instruments are (a) financial assets such as cash and cash equivalents, due from the Central Bank and other banks, securities purchased under resell agreement, receivables, discounts and loans, and parts of other financial assets (b) financial liabilities such as deposits to the Central Bank and other banks, securities sold under repurchased agreement, payables, deposits and remittances and other financial assets.

Financial liabilities				
Bank debentures	65,472,216	53,562,923	11,909,293	-

3) Measurement technique

Methods and assumptions applied in estimating the fair values of financial instruments not carried at fair value are as follows:

- a) The carrying amounts of financial instruments such as cash and cash equivalents, due from the Central Bank and call loans to other banks, securities purchased under resell agreements, receivables, part of other financial assets, due to the Central Bank and other banks, funds borrowed from the Central Bank and other banks, securities sold under repurchase agreements, payables, and remittances approximate their fair values because of the short maturities of these instruments.
- b) Discounts and loans, deposits, and principals of structured products are interest-earning financial assets/interest-bearing financial liabilities; thus, their carrying amounts approximate their fair values. The carrying amounts of nonperforming loans are estimated at their recoverable amounts after considering the reserve for credit losses; thus the carrying amounts are regarded as fair value.
- c) Held-to-maturity financial assets, debt instruments with no active market and bank debentures are based on their quoted prices in an active market. For those instruments with no quoted market prices, their fair values are determined using valuation techniques incorporating estimates and assumptions consistent with those generally used by other market participants to price financial instruments.
- d) Equity investments accounted for as financial assets carried at cost have no quoted prices in an active market and have a wide range of fair value measurements; hence, their carrying amounts are considered their fair value.

50. FINANCIAL RISK MANAGEMENT

a. Overview

The Bank and its subsidiaries have been fully devoted to establishing a robust risk management culture and environment, improving the comprehensive risk management system, pursuing the optimization of risks and rewards, formulating faultless risk management procedures and related business hedging strategies, complying with the risk management requirements of the Basel Accord framework, continually elevating professional level in risk management, assisting business sustainable growth, and optimizing shareholder's value.

The major risks faced by the Bank and its subsidiaries on and off balance sheet include credit risk, market risk (including interest rate, foreign exchange, equity and commodity risks) and liquidity risk.

The Bank and its subsidiaries have duly established risk management policies, principles, rules and regulations approved by the board of directors, to ensure consistent compliance with the comprehensive risk management systems, and to identify, measure, monitor, transfer, and mitigate the Bank and its subsidiaries' credit, market, and liquidity risks.

b. Risk management framework

Taipei Fubon Bank

The Bank adopts three lines of defense in its risk management framework to ensure operating effectiveness of risk management system. Business, operation, and management units each undertake the first line of defense role to ensure compliance with risk management requirements and implementation of the risk control procedures while performing their job functions. Risk management units assume an independent role in enacting the second line of defense, and are responsible for designing a risk management system, monitoring risk exposures and submitting risk reports. The audit department conducts the third defense line by independently examining the compliance of various risk management system and requirements.

The board of directors oversees the establishment of the Bank's effective risk management system and mechanism; approves risk management policies, principles, regulations and rules; and reviews important risk management reports. The Bank has established an Asset and Liability Management Committee ("ALCO") under the supervision of the Bank's chairman. This committee is in charge of the Bank's business strategy, manages assets and liabilities and capital adequacy, and sustains liquidity and enhances the management of the sources and use of capital to pursue the Bank's best interests under acceptable risks. The committee is chaired by the Bank's chairman and its members are comprised of the Bank's president and senior managers of the relevant departments. The committee meetings are held monthly and at other times depending on business needs.

To strengthen risk management functions, the Credit Risk Management Committee, Market Risk Management Committee, Operational Risk Management Committee, and Financial Risk Management Committee under the Bank's chairman have been established. The members of the committees include the Bank's president and senior managers of the relevant departments. The committees are chaired by the Bank's president. The committees' meetings are held monthly and at other times depending on business needs to review the mechanism for credit, market, operational, and financial risk management; review credit risk and country risk exposures, changes in positions and asset quality; monitor market risk limits and exposures; inspect operational loss events, relevant remedial courses of action, and control of financial product risk.

Furthermore, the Bank has established the Risk Management Division independent of business units, and this Division is responsible for monitoring and managing risks and submitting risk management reports to the board of directors periodically.

Fubon Bank (China)

The board of directors, as the highest decision-making body of Fubon Bank (China), takes ultimate responsibility for its risk management and decides Fubon Bank (China)'s overall risk tolerance. The special committee under the board of directors monitors and evaluates the effectiveness of Fubon Bank (China)'s risk management practices.

The senior management and its subcommittees are responsible for implementing risk policies authorized by the board of directors. They define individual risk management levels using a certain coding system, enhance the effectiveness of risk management practices, and optimize workflow. The Risk Management Department identifies, quantifies and monitors risk factors and reports on Fubon Bank (China)'s overall risks to senior management and the board of directors. The Internal Audit Department independently evaluates the internal control codes for effectiveness, comprehensiveness, and accuracy.

c. Credit risk

1) Credit risk definitions and sources

Taipei Fubon Bank

Credit risk refers to the risk of losses caused by borrowers, debtors, or counterparties' failure to fulfill their contractual obligations because of deteriorating financial position or other factors. It arises principally from businesses such as discounts, loans, credit cards, due from or call loans to banks, debt investments, derivatives etc., but also from off-balance sheet products such as guarantees, acceptance, letters of credit and other commitments.

Fubon Bank (China)

Credit risk is the primary risk faced by Fubon Bank (China), and it mainly comes from commercial lending (discounts, negotiations, acceptance bills, issued letters of credit, standby letters of credit, bank guarantees, etc.), financial derivative contracts, and bond investments.

2) Strategy/objectives/policies and procedures

Taipei Fubon Bank

The Bank has established solid credit risk policies and procedures. A robust credit risk strategy taking into account the economic environment, industry sector and financial sector as well as corporate business plan is in place. The Bank pursues the optimization of risks and rewards. Comprehensive credit risk management systems and tools have been deployed effectively to identify, evaluate, monitor and report credit risks including default, counterparty and concentration risks.

Fubon Bank (China)

The credit risk management of Fubon Bank (China) is based on its comprehensive risk management system. Under this system is the Risk & Related Party Transaction Committee, which the board of directors oversees. This Committee supervises the implementation of credit risk policies, evaluates risk tolerances and makes recommendations on the strengthening of credit risk management practices. The Credit Committee, which is supervised by senior management, reviews credit lines within a certain limit. The Supervisory Committee, which is also under the board of directors' oversight, approves Fubon Bank (China)'s lending policies as well as authorizes credit lines that exceed the Credit Committee's authorized approval limit to strengthen risk control over large credit lines. Fubon Bank (China) also has a Risk Management Department, which includes the Risk Control Division, Credit Policy & Planning Division, Post-Disbursement Risk Management Division and Credit Approval & Administration Division, which identify, quantify, monitor and control Fubon Bank (China)'s credit risk.

3) Credit risk management framework

Taipei Fubon Bank

a) To strengthen risk management function, under the supervision of the board of directors, the Bank has established the Credit Risk Management Committee, which is composed of senior management and chaired by the President, to examine credit risk policies and quotas and to monitor the Bank's credit risk control, credit risk acceptance and management strategy on the credit business, securities investments and transactions, and derivatives.

- b) To enhance the independence of credit risk management, the Bank has established the Risk Management Division, which is responsible for measuring the Bank's risk exposures; monitoring risk limits; reporting; and coordinating the development of the mechanism for managing credit risk and validating risk models.
- c) In business lines, the Bank has business units that ensure compliance with control requirements while performing daily business operations.
- d) The Bank has established an Institutional Credit Review Committee and a Retail Credit Review Committee to review credit above a certain limit to strengthen control over cases involving large credit amounts.
- e) The audit department, which is under the supervision of the board of directors, conducts the third defense line of examining independently the effectiveness of internal control functions.

Fubon Bank (China)

Fubon Bank (China)'s current credit risk management is based on its comprehensive risk management system. Divisions under the Risk Management Department, including the Credit Approval & Administration Division and the Risk Control Division, are responsible for identifying, quantifying, monitoring, controlling and reporting on Fubon Bank (China)'s credit risk.

4) Credit risk measurement, control and reporting

Taipei Fubon Bank

- a) The Bank has established credit risk measurements and control procedures, including underwriting, risk rating, limit control, account maintenance, pre-settlement limit control and collection management systems, which enable the Bank to manage and limit the country risk, single legal entity and group exposure risk, and industry concentration risk effectively. The Bank has also established a vigorous review and early warning mechanism to ensure that there are proper actions taken for effective credit risk management.
- b) The Bank regularly performs credit risk stress testing based on the guideline issued by the Financial Supervisory Commission. It continues to develop scenario analysis and stress testing to provide senior management with an assessment of risk tolerance, as well as to provide a sound basis for credit portfolio management.
- c) The Bank has completed several Basel Accord credit risk management projects, including risk data warehousing system, internal risk rating system, and the risk-weighted asset calculation system. The development and revision of score card and rating models are validated independently by the Risk Management Division to monitor the model performance and stability.

Fubon Bank (China)

- a) The credit risk control process includes credit policy development, credit approval, early warning and collection. Credit risk supervision includes the regular follow-up of high-risk cases, exposure limit control of country risk, and customer credit grading management; and real-estate loan monitoring and other monthly monitoring, which includes industry concentration and the concentration of single clients/group clients and its affiliated parties.
- b) Fubon Bank (China) makes a regular credit portfolio stress test for industry, products, regions, and customers based on the actual status of the credit portfolio. The stress test results, including changes in results due to differences in risk triggers, will be reported at the board meeting and serve as reference for risk management and decision-making.

c) The credit management system of Fubon Bank (China) has modules for credit approval, loan ledger management, collateral information maintenance, customer grading management and five-category asset classification for bank loans. The system can support credit risk management effectively.

5) Credit risk mitigation

Taipei Fubon Bank

The Bank has established sophisticated limits in controlling concentration risks on credit, securities investment and counterparty exposures. Risk rating is assessed for each borrower on the basis of the stringent evaluation of obligor risk and facility risk. Further, the Bank has set a centralized approval process with documented guidelines and dual authorizations. Appropriate collaterals are required on the basis of borrowers' financials and debt service capabilities to mitigate credit risk.

Fubon Bank (China)

Fubon Bank (China) has credit and approval authorization limits based on a customer risk grading and loan classification and guarantee and sub-guarantee criteria, and investment portfolio management is based on the "Institutional Banking Risk Policy and SOP". Fubon Bank (China) also strengthens risk identification on the basis of a customer's risk grading. Credit quality control is done through strict and highly thorough due diligence and approval procedures, which include having the credit officers from both the sales department and the risk department sign credit approval documents. Fubon Bank (China) also requires appropriate collaterals to enhance loan risk mitigation. In addition, there is post-loan management, which includes continual loan monitoring and taking note of any early risk-warning signals.

6) Maximum exposure to credit risk

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheet without taking into consideration any collateral held or other credit enhancements. The maximum credit exposures of the off-balance sheet financial instruments (before taking account of any collateral held or other credit enhancements) are summarized as follows:

Taipei Fubon Bank

	Maximum Exp	osure Amount
Off-Balance Sheet Item	December 31,	December 31,
	2017	2016
Irrevocable credit commitments	\$ 76,409,378	\$ 90,031,332
Standby letters of credit	10,407,936	8,893,665
Financial guarantees	29,397,044	32,089,282
Total	\$ 116,214,358	\$ 131,014,279

Fubon Bank (China)

(In Thousands of RMB)

	Maximum Exposure Amount					
Off-Balance Sheet Item	December 31, 2017	December 31, 2016				
Irrevocable credit commitments	\$ 2,542	\$ 140,375

Guarantees receivable	70.50%	25.76%	3.50%	-
Acceptances	54.02%	6.14%	20.04%	-

7) Concentrations of credit risk exposure

Concentrations of credit risk arise when a number of counterparties or exposures have similar economic characteristics, or counterparties are engaged in similar activities, or operate in the same geographical areas or industry sectors, so that their collective ability to meet contractual obligations is uniformly affected by changes in economic or other conditions.

Credit risk concentrations can arise in the Bank and its subsidiaries' assets, liabilities, or off-balance sheet items, through the execution or processing of transactions (either product or service), or through a combination of exposures across these broad categories. It includes credits, loans and deposits, call loans to banks, investments, receivables and derivatives. To manage credit risk, the Bank and subsidiaries maintain a diversified portfolio, limit their exposure to any one geographic region, country or individual creditor, and monitor their exposure continually. The Bank and subsidiaries' most significant concentrations of credit risk are summarized as follows:

8) Credit quality and impairment assessment

Some financial assets-such as cash and cash equivalents, due from the Central Bank and call loans to banks, financial assets at fair value through profit or loss, repos and debt securities, refundable deposits, guaranty bonds, and clearing and settlement fund-are regarded as having very low credit risk due to the good credit rating of counterparties.

The credit quality of discounts, loans, receivables and investments has three classifications, defined below. Each classification consists of a range of more granular, internal credit rating grades assigned to the wholesale and retail lending businesses, as well as external ratings attributed by external agencies to investment.

The credit quality classifications are defined as follows:

Taipei Fubon Bank

- a) Good: Exposures demonstrate a good capacity to meet financial commitments, with low default risk and/or low levels of expected loss.
- b) Moderate: Exposures require closer monitoring and demonstrate an average to fair capacity to meet financial commitments, with moderate default risk.
- c) Substandard: Exposures require varying degrees of special attention and default risk is of greater concern.

Fubon Bank (China)

- a) Moderate: Borrower can meet the loan contract terms. There is no reason to doubt the borrower's repayment capacity.
- b) Special-mention: Some negative factors may affect the completion of a borrower's repayment even though the borrower has the capacity to make regular repayments until now.

The Bank and its subsidiaries' credit analysis of financial assets are set out below:

9) Aging analysis of overdue but not yet impaired financial assets

Taipei Fubon Bank

Delays in processing payments by borrowers and other administrative reasons could result in unimpaired financial assets becoming overdue. Based on the Bank and its subsidiaries' internal risk management policies, financial assets overdue within 90 days are not considered impaired, unless evidences show otherwise.

Aging analysis of overdue but not yet impaired financial assets was as follows:

			Decembe	r 31, 2	017

10) Analysis of impairment of financial assets

A part of the Bank and its subsidiaries' investments in available-for-sale financial assets and financial assets carried at cost were considered impaired because there were some objective evidences of impairment loss provided by investee companies. Refer to Notes 13 and 18.

The Bank and its subsidiaries have assessed whether loans and receivables have objective evidence of impairment. The assessment on December 31, 2017 and 2016 had the following results:

Discounts and loans

		Decembe	r 31, 2017	December 31, 2016			
Type of Impairment Assessment		Discounts and Loans	Allowance for Credit Losses	Discounts and Loans	Allowance for Credit Losses		
With objective	Individually assessed for impairment	\$ 8,152,638	\$ 3,411,926	\$ 11,066,457	\$ 2,881,859		
evidence of impairment	Collectively assessed for impairment	1,901,225	91,709	1,853,308	84,190		
With no objective evidence of impairment	Collectively assessed for impairment	1,393,821,140	16,052,948	1,295,592,087	15,104,101		

Receivables

			r 31, 2017	December 31, 2016			
Type of Impairment Assessment		Receivables Allowance for Credit Losses		Receivables	Allowance for Credit Losses		
With objective	Individually assessed for impairment	\$ 289,213	\$ 161,557	\$ 1,000,435	\$ 869,502		
evidence of impairment	Collectively assessed for impairment	664,171	100,594	769,769	117,279		
With no objective evidence of impairment	Collectively assessed for impairment	81,002,969	350,122	70,000,869	364,235		

- Note 1: The receivables are those originated by the Bank and its subsidiaries, and not net of the allowance for credit losses and adjustments for discount (premium).
- Note 2: The above receivables and allowances include nonperforming loans reclassified from other than loans and bills purchased.

11) Management policies on collaterals assumed

The collaterals held by Fubon Bank (China) are currently evaluated based mainly on the "Measures for the Administration of Debt-expiated Assets in Banks". The properties of the collaterals held by Fubon Bank (China) are buildings. As of December 31, 2017 and 2016, the carrying amounts of the properties were \$87,926 thousand and \$89,086 thousand, respectively. Collaterals assumed are classified as other assets in the consolidated balance sheets.

d. Liquidity risk

1) Source and definition of liquidity risk

Liquidity risk means that banks cannot provide sufficient funding for asset size growth and meeting obligations on matured liabilities and have to delay payments to counterparties or raise funds to cover funding gaps.

2) Liquidity risk management strategy and principles

Taipei Fubon Bank

- a) The Bank's strategy is to lower liquidity risk by acquiring stable, low interest-rate, sufficient funding to cover asset size growth and meet obligations on matured liabilities and to escape gaps between funding availability and demand.
- b) The principle is to harmonize fund availability with the Bank's deposit, loan and financial transaction growth. The Bank adjusts its funding strategy depending on market fund change and the Central Bank's policies to increase fund use and lower liquidity risk. Thus, the Bank not only pays attention to maturities of long-term and short-term securities to match the timing of large-amount loan drawdowns and repayments, but also analyzes the stability and percentages of various types of deposits to manage funding liquidity.
- c) The Bank has a capital liquidity control index to monitor and manage the Bank's liquidity risk.
 - i. Capital liquidity control index and relevant analysis approved by the board of directors are regularly reported to the Asset and Liability Management Committee ("ALCO"), and the directors (permanent) are all prepared for future reference.
 - ii. Capital liquidity control index and relevant analysis approved by the ALCO are regularly reported to the ALCO, and the Bank's chairman.

Fubon Bank (China)

a) The liquidity risk management strategy of Fubon Bank (China) aims not only to meet compliance and regulatory requirements but also to find a sound balance between business performance and adequate liquidity position. By adjusting its short-term and long-term asset allocation and dispersing fund sources on the basis of market conditions, the Bank manages its liquidity risk exposure at an acceptable level to ensure the sustainability of its business operations and maintain its fine reputation.

- b) Fubon Bank (China) maintains a strategically defined risk appetite for its liquidity management. Daily liquidity management is centralized given the size and complexity of its current business scope, and Fubon Bank (China)'s organization structure is suitable for managing liquidity exposure. The board of directors takes the ultimate responsibility for Fubon Bank (China)'s liquidity risk. The senior management, which is in charge of implementing liquidity management policies and procedures, has authorized the Asset and Liability Management Committee to perform related management duties daily. Liquidity risk assessment reports are prepared by the senior management for submission to the Risk & Related Party Transaction Committee.
- c) Fubon Bank (China)'s liquidity risk management involves the full participation of staff in the dynamic prevention, scientific quantification and prudent management of risk to ensure Fubon Bank (China) has sufficient funding for its capital growth and various obligations.

3) Maturity analysis

The Bank and its subsidiaries' management policy is to match maturities of and interest rates for assets and liabilities, i.e., because of uncertainties of terms and conditions or types, the maturities of and interest rates for assets and liabilities usually do not match perfectly, resulting in potential gain or loss. To maintain proper liquidity, the Bank and its subsidiaries use appropriate ways to group assets and liabilities to evaluate liquidity and monitor the ratios of short-term negative funding gap to total assets denominated in major currencies.

The analysis of cash inflow and outflow on assets and liabilities held for liquidity risk was based on periods from the reporting date to contractual maturity dates. The maturity analysis of financial assets and liabilities, derivative assets and liabilities, and off balance sheet items denominated in major currencies was as follows (except for non-deliverable derivatives, all were non-discounted contractual cash flows):

a) Maturity analysis of financial assets and liabilities - NTD

g) Maturity analysis of off-balance sheet items

The maturity analysis of off-balance sheet items shows the remaining balance from the balance sheet date to the maturity date. For the sent financial guarantee contracts, the maximum amounts are possibly asked for settlement in the earliest period. The amounts in the table below were on cash flow basis; therefore, some disclosed amounts will not match those in the consolidated balance sheet.

e. Market risk

1) Market risk definition and classifications

Market risk refers to unfavorable changes in the market (such as changes in interest rates, exchange rates, stock prices and commodity prices), which may cause a potential loss on or off the balance sheet. Based on the Bank's policies on risk measurement and management, financial instruments are recorded in either the trading book or the banking book, and the Bank performs risk measurement and management accordingly.

Trading book positions are as follows:

- a) Positions held for earning profits from changes in bid-ask spread or changes in prices and interest rates;
- b) Positions held for the brokerage business or proprietary trading;
- c) Positions held for full or partial offsetting of risk from other positions; and
- d) Positions held for trading within approved market risk limits.

Trading book positions should not be under any restrictive trading contracts and should be completely hedged against risks. Positions that do not qualify for recording in the trading book are recorded in the banking book.

2) Market risk strategy and procedures

Taipei Fubon Bank

The Bank has comprehensive policies on market risk management and has a systematic mechanism for deal execution, clearing and settlement. The trading book instruments, which are exposed to risk factors, are as follows: interest rate-related instruments, exchange rate-related instruments, securities and commodities. The risk management systems apply the Bank's management policies and market risk limits to identify, measure, monitor and control market risks.

Fubon Bank (China)

Based on relevant laws and regulations, various regulations and control procedures on market risk management policies have been established for the internal control of market risks as well as the strategic development of trading strategies and limits. IT systems have also been set up to identify, quantify, monitor and control market risks to ensure that the market risk exposures of Fubon Bank (China) are managed strongly and effectively.

3) Market risk management framework

Taipei Fubon Bank

Under the supervision of its board of directors, the Bank has established the Market Risk Management Committee, which is composed of senior management and chaired by the Bank's president to monitor the Bank's market risk control, risk acceptance and management strategies for the trading business, securities investments and transactions, and derivatives.

The Risk Management Department under the Chief Risk Officer is responsible for formulating policies on and procedures for market risk management, enforcing market risk limits, reporting market risk events timely and validating valuation models independently. The independent audit department under the Bank's board of directors is an added support for the market risk management framework.

Fubon Bank (China)

The board of directors of Fubon Bank (China), which is at the highest level of supervising market risk management, approves the market risk management strategies and trading limits of this bank. The Risk & Related Party Transaction Committee, under the board of directors, is responsible for supervising the implementation of market risk management policies. Market risk assessment reports are submitted quarterly by the Risk Management Department to senior management, the Risk & Related Party Transaction Committee and the board of directors.

The Risk Control Department, under the Risk Management Department, which is independent of the front trading desk and back settlement desk, is responsible for implementing market risk management policies authorized by Fubon Bank (China)'s board of directors and senior management. The Internal Audit Department is responsible for reviewing and evaluating the effectiveness and independence of the risk management system. The Compliance Department is in charge of monitoring compliance risks and submitting related reports to Fubon Bank (China)'s board of directors and senior management.

4) Market risk measurement, control and reporting

The Corporate Financial Credit Management Department is responsible for monitoring compliance with the daily market risk limit (including the analysis of risk sensitivity factors such as Delta, Vega, DV01, and Value at Risk ("VaR") and loss control. The valuation of financial instruments is evaluated independently by the Market Risk Management Department to ensure their stability and effectiveness. The Bank has established a market risk management system and related market risk management procedures to be able to observe the VaR limit. In addition, the Bank does back testing periodically to check the effectiveness of the VaR calculation module and establishes financial trading system.

5) Measurement of trading book market risk

Taipei Fubon Bank

The Bank's measurement of the trading book market risk includes methods for determining degrees (known as the "Greeks") of sensitivity to risk and measures (such as VaR and stress testing) of the risk of loss on specific portfolios of financial assets. These measures provide consistent and comparable measurement of various types of risks across different trading desks.

a) Value at Risk ("VaR")

VaR is a tool that measures "the worst expected loss over a given time horizon under normal market conditions at a given level of confidence". TFB has various risk models to evaluate the worst loss on current net positions within one day, with a 99% confidence level. The method for VaR calculation is the historical simulation, which is used to calculate current VaR. In order to ensure the quality of the risk value, the Bank conducts periodic review and statistical verification of actual profit and loss.

Trading book VaR information is shown below:

	For the Year Ended December 31, 2017							
Common VaR	Highest	Lowest	Mean	End of Year				
Equity	\$ -	\$ -	\$ -	\$ -				
Interest rate	94,459	42,826	59,745	51,387				
Exchange rate	17,482	3,529	7,979	4,534				
Volatility	6,047	794	2,731	794				
Diversification effect	-	-	(11,169)	(7,693)				
Common VaR of trading book			\$ 59,286	\$ 49,022				

	For the Year Ended December 31, 2016							
Common VaR	Highest		Lowest		Mean		End of Year	
Equity	\$	-	\$	-	\$	_	\$	_
Interest rate	62	2,229	29	9,654	39	,444	62	2,229
Exchange rate	19	9,905	,	2,688	7	,783	6	5,794
Volatility	38	3,684		1,322	8	3,626	13	3,663
Diversification effect		-		-	(13	<u>3,311</u>)	(16	<u>5,286</u>)
Common VaR of trading book					<u>\$ 42</u>	2,542	\$ 66	<u>5,400</u>

Note: The highest and lowest VaRs may occur on different dates; the related diversification effects were not disclosed in the above table because these effects were not significant.

The above VaRs are calculated on the basis of changes in risk factors. If one product includes several risk factors, it will be classified under different risk factors. For example, forward contracts are exposed to interest rate risk and exchange rate risk; foreign exchange option is exposed to exchange rate risk and volatility risk.

b) Stress testing

As described earlier, VaR refers to the worst loss likely to occur over a holding period with a given confidence level during normal fluctuation. However, VaR cannot be used to predict the loss when an extreme event or systematic risk occurs. Thus, stress testing is introduced to capture the above risk by measuring the potential impact on trading book portfolio during the abnormal market period, compensating for the insufficiency of common VaR.

Fubon Bank (China)

To manage the trading book market risks, Fubon Bank (China) has set appropriate market risk measurements and risk limits based on its trading products and the features and complexity of its risk exposures, including position limits, stop-loss limits of various products, and risk sensitivities. In the trading book, the main currency business of Fubon Bank (China) is spot trade and currency forwards and options trade. The main interest rate business is bond trade, currency swap and RMB interest swap trade. The market risk level is normal.

The Risk Control Department also performs stress tests quarterly on derivative transactions recorded in the trading book to evaluate the ability of Fubon Bank (China)'s ability to sustain loss on the market value of the derivative transactions shown in its trading book when main market risk factors, mainly interest rates and exchange rates, move adversely.

6) Measurement of banking book market risk

Taipei Fubon Bank

a) Interest rate risk

Interest rate risk refers to the possible loss on investment portfolio value due to interest rate changes. The interest rate-sensitive assets/liabilities include banking book debt securities. The characteristics of banking book debt securities differ from those of trading book securities, which are for short-term trading. The valuation basis of banking book debt securities includes fair value and accrued interest.

Banking book interest rate risk refers to possible loss due to unfavorable changes in interest rates for the banking book portfolio. One of the methods used to determine exposure to interest rate risks is earnings analysis, which focuses on the effects interest rate changes on the earnings of the banking book portfolio, especially earnings in the short term. Had the interest rate increased/decreased 1bps (basis points) as of December 31, 2017 and 2016 and all other factors been held constant, the earnings would have decreased/increased by \$5 million and \$22 million, respectively.

b) Exchange rate risk

Banking book exchange rate risk refers to the risk of loss due to unfavorable changes in exchange rates for the Bank's foreign currency operating funds to be used for the launch of a foreign exchange business, the establishment of overseas branches or overseas subsidiaries' branches' investments accounted for using the equity method. These exchange rate differences are reflected under either the statement of comprehensive income or under exchange differences on translating foreign operations in equity.

The Bank's overseas branches and these branches' long-term equity-method investments have foreign exchange businesses. The percentage of the foreign currency operating funds used for the foreign exchange business operations is low when compared with the Bank's entire foreign currency position. As of December 31, 2017, for the operating funds of overseas branches, the Bank considers the ratio of exchange differences on translating foreign operations to the equity of the Bank's owners to be immaterial.

c) Equity risk

The Bank's equity instruments as shown in the banking book have two groups. The first consists of investments in accordance with Article 74 of the Banking Act. The second group refers to investments in promising companies with a higher cash dividend payout ratio. For the second group, even though changes in equity prices may influence shareholders' equity, the Bank holds these investments for a long term and has strict regulations on buying or selling these investments.

The sensitivity analysis for the second equity positions group is listed below:

	December 31				
	20	17	20)16	
	Influence on Profit and Loss	Influence on Other Equity	Influence on Profit and Loss	Influence on Other Equity	
Stock price increase by 10% Stock price decrease by 10%	\$ 30,036 (30,036)	\$ 296,393 (296,393)	\$ 35,097 (35,097)	\$ 619,855 (619,855)	

Fubon Bank (China)

a) Interest rate risk

Fubon Bank (China)'s interest rate risk is mainly from interest repricing. Banking book interest rate risk is monitored by computing the repricing gap of risk-sensitive assets/liabilities and to develop risk standards as the monitoring benchmark. In this computation, an increase or decrease in interest rate by 50 basis points is used to evaluate risk.

(In Thousands of RMB)

	December 31				
	20)17	2016		
	Impact on Profit and Loss	Impact on Other Equity	Impact on Profit and Loss	Impact on Other Equity	
Interest rate increases 50 basis points Interest rate decreases 50	\$ (11,269)	\$ (75,245)	\$ (34,653)	\$ (16,340)	
basis points	11,269	77,762	34,653	16,396	

b) Exchange rate risk

Fubon Bank (China) uses RMB for its loans/deposits, and interbank borrowings. Foreign currency is mainly composed of USD. To control the exchange rate risk effectively, Fubon Bank (China) implements a policy of controlling foreign currency position and simultaneously making a foreign currency sensitivity analysis based on its own risk-taking ability and operating strategy. Assuming that the foreign currency appreciates or depreciates 5% the RMB for all spot rates and forward rates, the outcome is as follows:

(In Thousands of RMB)

	December 31				
	20	17	2016		
	Influence on Profit and Loss	Influence on Other Equity	Influence on Profit and Loss	Influence on Other Equity	
USD and HKD appreciate by 5% against the RMB USD and HKD appreciate by	\$ (44,312)	\$ 8,351	\$ 25,691	\$ 8,921	
5% against the RMB	44,312	(8,351)	(25,691)	(8,921)	

7) Foreign currency rate risk information

The table below shows the foreign currency risk information on the carrying values of all financial assets and liabilities denominated in foreign currency as of December 31, 2017 and 2016.

f. Transfers of financial assets

Transfers of financial assets not qualifying for derecognition

The transferred financial assets of the Bank and its subsidiaries that do not qualify for derecognition in the daily operation are mainly securities sold under repurchased agreement and equity security lending agreements.

The transaction transfers the contractual rights to receive the cash flows of the financial assets but the Bank and its subsidiaries retain the liabilities to repurchase the transferred financial assets at fixed prices in the future.

The Bank and its subsidiaries cannot use, sell, or pledge these transferred financial assets within the validity period of the transaction. However, the Bank and its subsidiaries still bear the interest rate risk and credit risk; thus, the Bank and its subsidiaries do not derecognize these assets.

The analysis of financial assets and related liabilities that do not qualify for derecognition is shown in following table:

	December	31, 2017
Category of Financial Asset	Transferred Financial Assets - Book Value	Related Financial Liabilities - Book Value
Transactions under repurchased agreements		
Financial assets at fair value through profit and loss Discounted note	\$ 1,004,618 6,461,588	\$ 1,007,092 6,560,623
Available-for-sale financial assets	50,953,338	48,079,115
Held-to-maturity financial assets	41,179,732	37,999,295
Debt instruments with no active market	4,398,597	4,379,450

	December	ber 31, 2016

g. Offsetting of financial assets and financial liabilities

The Bank and its subsidiaries had no financial instruments that were covered by the offsetting requirements under Section 42 of IAS 32 "Financial Instruments: Presentation" endorsed by the Financial Supervisory Commission.

The Bank and its subsidiaries engage in transactions with net settlement contracts or similar agreements with counterparties instead meeting offsetting condition in IFRSs, ex: Global master repurchase agreement, global securities lending agreement and similar repurchasing agreement or reverse-repurchasing agreement. These executable net settlement contracts or similar agreements allow net settlement of financial assets and financial liabilities as agreed upon by the transacting parties. If one party defaults on a contract, the other one may choose net settlement.

Related Amount Not Netted on the

The netting information on financial assets and financial liabilities is set out below:

51. CAPITAL MANAGEMENT

a. Overview

Under the "Regulation Governing the Capital Adequacy and Capital Category of Banks" implementing Article 44 of the Banking Act for minimum requirements on the regulatory capital to risk (weighted) assets ratio (i.e. the capital adequacy ratio), the Bank's regulatory capital and consolidated eligible capital should be higher than the statutory requirement. This is the fundamental principle of capital management.

For sound operations, the Bank has established internal control policies to ensure its capital adequacy ratio meets the minimum regulatory requirement.

b. Capital management procedures

The Bank's capital is managed by the Bank's Capital Adequacy Management Policy, which was approved by the board of directors. Regulatory capital is calculated in accordance with the "Regulations Governing the Capital Adequacy and Capital Category of Banks," and reported to the authority quarterly. Regulatory capital is classified into net Tier 1 capital (the aggregate amount of net common equity Tier 1 and net additional Tier 1 capital) and net Tier 2 capital. In addition, adjusted items include the change in credit risk of financial liabilities recognize as unrealized gains and losses (where gains should be deducted, and losses should be added back).

1) Net Tier 1 capital

- a) Net common equity Tier 1 capital: Common equity mainly includes common stock, capital surplus, retained earnings, other equity, and non-controlling interests, with the total net of the following items: Intangible assets, unrealized gains on available-for-sale financial assets, revaluation gains on investment properties subsequently measured using the fair value model, the revaluation surplus on real estate, and 25% of the amount of investments related to the financial industry as shown in the banking book.
- b) Net additional Tier 1 capital: The capital issued by the Bank's subsidiaries but not held by the Bank minus 25% of the investment related to the financial industry as shown in the banking book.

2) Net Tier 2 capital

This capital base comprises the total amount of long-term subordinated bank debentures that the Bank's subsidiaries issued but not held by the Bank's capital, the increase in retained earnings resulting from using fair value or revaluation as the deemed cost of the real estate on the translation date of IFRSs, and 45% of the amount of unrealized gain on available-for-sale financial assets, 45% of the revaluation gains on investment properties subsequently measured using the fair value model, operating reserves and loan loss provision allowance (the amount is determined when the allowance the Bank recognized is more than the expected loss based on the historical experience) less 50% of the amount of investments related to the financial industry as shown in the banking book.

The Bank evaluates capital adequacy regularly as well as the future demand for capital and raises the capital if needed to maintain capital adequacy.

c. Statement of capital adequacy

As of December 31, 2017, the Bank and its subsidiaries had met the authorities' minimum requirements for capital adequacy ratio. Refer to Note 54.

52. RECLASSIFICATIONS

On January 1, 2012, the Bank reclassified its financial assets. The fair values at the reclassification date were as follows:

	Before Reclassification	After Reclassification
Available-for-sale financial assets Held-to-maturity financial assets	\$ 12,052,604 	\$ - 12,052,604
	<u>\$ 12,052,604</u>	<u>\$ 12,052,604</u>

The effective interest rates for the available-for-sale financial assets that have been reclassified to held-to-maturity financial assets ranged from 0.52% to 9.95%. The estimated recoverable cash flows amounted to \$13,966,953 thousand.

The carrying amounts and fair values of the reclassified financial assets (excluding those that had been derecognized) as of December 31, 2017 and 2016 were as follows:

	December 31		
	2017	2016	
Held-to-maturity financial assets			
Carrying amounts Fair value	\$ 400,660 403,448	\$ 554,884 554,411	

The gains or losses recorded for the reclassified financial assets (excluding those that had been derecognized before December 31, 2017 and 2016) for the years ended December 31, 2017 and 2016 and the pro forma adjustments recognized in other equity assuming no reclassifications had been made were as follows:

	For the Year En	ded December 31
	2017	2016
Held-to-maturity financial assets		
Gains recognized Pro forma adjustments recognized in other equity	\$ 9,027 1,166	\$ 18,420 (2,352)

53. ASSET QUALITY, CONCENTRATION OF CREDIT EXTENSIONS, INTEREST RATE SENSITIVITY, PROFITABILITY AND MATURITY ANALYSIS OF ASSETS AND LIABILITIES

Except for profitability described in item (d) below, the following information only refers to the Bank.

a. Asset quality

See Table 1.

b. Concentration of credit extensions

December 31, 2017

Rank (Note 1)	Group Name (Note 2)	Credit Extensions Balance (Note 3)	% to Net Asset Value
1	Group A (petrochemical raw material manufacturing industry)	\$ 11,566,839	6.43
2	Group B (LCD and its component manufacturing industry)	11,249,797	6.25
3	Group C (other electronic component manufacturing industry)	8,300,759	4.61
4	Group D (other electronic component manufacturing industry)	8,267,889	4.59
5	Group E (passive electronic components manufacturing industry)	8,240,000	4.58
6	Group F (ocean transport industry)	7,272,046	4.04
7	Group G (real estate industry)	5,971,397	3.32
8	Group H (wire and cable manufacturing industry)	5,746,819	3.19
9	Group I (ocean transport industry)	5,494,754	3.05
10	Group J (Financial service industry)	5,397,768	3.00

December 31, 2016

Rank (Note 1)	Group Name (Note 2)	Credit Extensions Balance (Note 3)	% to Net Asset Value
1	Group A (petrochemical raw material manufacturing industry)	\$ 11,294,507	6.47
2	Group B (computer peripheral devices manufacturing industry)	6,553,803	3.75
3	Group C (ocean transport industry)	5,167,344	2.96
4	Group D (paper manufacturing industry)	4,710,458	2.70
5	Group E (other financial services industry)	4,503,320	2.58
6	Group F (LCD and its component manufacturing industry)	4,427,117	2.54
7	Group G (integrated circuits manufacturing industry)	4,047,501	2.32
8	Group H (other information supply services industry)	3,228,121	1.85
9	Group I (computer manufacturing industry)	3,175,923	1.82
10	Group J (footwear and wearing apparel manufacturing industry)	2,997,746	1.72

Note 1: The list shows ranking by total amounts of credit, endorsement or other transactions (excluding those of government-owned or state-run enterprises). If the borrower is a member any of the above groups, the total amount of credit, endorsement or other transactions of the entire group must be listed and disclosed by code and line of industry. The industry of the Group should be represented by the industry of the entity with the highest risk exposure. The lines of industry should be described in accordance with the Standard Industrial Classification System of the Republic of China published by the Directorate-General of Budget, Accounting and Statistics under the Executive Yuan.

Note 2: A group refers to a combination of corporate entities as defined by Article 6 of the Supplementary Provisions to the Taiwan Stock Exchange Corporation Criteria for Review of Securities Listings.

Note 3: The total amount of credits, endorsements or other transactions is the sum of various loans (including import and export negotiations, discounts, overdrafts, unsecured and secured short-term loans, margin loans receivable, unsecured and secured medium-term loans, unsecured and secured long-term loans and overdue loans), exchange bills negotiated, accounts receivable factored without recourse, acceptances and guarantees.

	Warket 118K	Internal models approach	-	-	-	-
	Total risk-we	ighted assets	1,602,306,374	1,336,099,201	1,482,852,748	1,254,550,724
Total capital ac	lequacy ratio		13.42%	13.93%	13.98%	14.40%
Common equit	y Tier 1 ratio		10.86%	12.11%	11.35%	12.57%
Tier 1 capital ra	atio		10.97%	12.11%	11.46%	12.57%
Leverage ratio			6.20%	6.44%	6.66%	7.09%

Note 1: The above table was prepared in accordance with the "Regulations Governing the Capital Adequacy and Capital Category of Banks" and related calculation tables.

Note 2: The formula:

1) Regulatory capital = Net common equity Tier 1 capital + Net additional Tier 1 capital + Net Tier 2 capital.

- 2) Total risk-weighted assets = Risk-weighted assets for credit risk + (Capital requirements for operational risk + Capital requirement for market risk) × 12.5.
- 3) Total capital adequacy ratio = Regulatory capital/Total risk-weighted assets.
- 4) Common equity Tier 1 ratio = Net common equity Tier 1 capital/Total risk-weighted assets.
- 5) Tier 1 capital ratio = (Net common equity Tier 1 capital + Net additional Tier 1 capital)/Total risk-weighted assets.
- 6) Leverage ratio = Net Tier 1 capital/Exposure measurement.

55. SEGMENT INFORMATION

The segment information reported to the chief operating decision maker for assessment of segment performance focuses on the nature of business operations and pretax profit or loss.

The accounting standards and policies mentioned in Note 4 to the consolidated financial statements apply to all the business segments. Under IFRS 8 "Operating Segments," the Bank and its subsidiaries report the following:

- a. Personal finance group: Responsible for wealth management, trust and consumer finance business, etc.
- b. Corporate banking group: Responsible for corporate and investment banking, financial markets and public treasury, etc.
- c. Overseas subsidiary: On the business operations of the Bank's subsidiary, Fubon Bank (China).
- d. Others: Except for the above segments, the other business segments.

The Bank and its subsidiary's segment revenue and operating results, and geographical information are as follows:

a. Segment revenue and operating results

For the year ended December 31, 2017

	Personal Finance	Corporate Banking	Overseas Subsidiary	Others	Total

- Note 1: These are the reported overdue loans as defined in the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Nonperforming/Nonaccrual Loans" issued by the Ministry of Finance. For credit cards, overdue receivables are subject to the Banking Bureau's regulations dated July 6, 2005 (Ref. No. 0944000378).
- Note 2: For loans, NPL ratio = NPL/Total loans. For credit cards, delinquency ratio = Overdue receivables/Accounts receivable.
- Note 3: For loans, coverage ratio = LLR/NPL. For credit cards, coverage ratio = Allowance for credit losses/Overdue receivables.
- Note 4: Household mortgage refers to loans granted for the purchase, construction or repair of the residence owned by the borrower's spouse or children, and the residence is used to secure the loan fully.
- Note 5: Microcredits are subject to the Banking Bureau's regulations dated December 19, 2005 (Ref. No. 09440010950).
- Note 6: Other consumer loans refer to secured or unsecured loans excluding mortgages, cash cards, microcredits, and credit cards.
- Note 7: Under the Banking Bureau's requirements in its letter dated July 19, 2005 (Ref. No. 094000494), an allowance for bad debts should be recognized once no compensation is obtained from a factoring or insurance company for accounts receivable-factoring with no recourse.
- Note 8: The disclosure of excluded NPLs and excluded overdue receivables resulting from debt negotiations and loan agreements are based on the Banking Bureau's requirement dated April 25, 2006 (Ref. No. 09510001270).
- Note 9: The disclosure of excluded NPLs and excluded overdue receivables resulting from consumer debt clearance is based on the Banking Bureau's requirement dated September 15, 2008 (Ref. No. 09700318940) and September 20, 2016 (Ref. No. 10500134790).
